Multiphoton Processes International Conference on Multiphoton Processes, University of Rochester, 1977, J. H. Eberly, Peter Lambropoulos, 1978 *Multiphoton Processes* Peter Lambropoulos, 1978 *Multiphoton Processes* P. Lambropoulos, S. J. Smith, 2012-12-06 The chapters of this volume represent the invited papers delivered at the 3rd International Conference on Multiphoton Processes ICOMP III held in Iraklion Crete Greece September 5-11 1984 The invited papers at a conference like ICOMP cannot possibly cover the whole field which has grown to immense proportions in recent years overlapping with such diverse areas as atomic and molecular spectroscopy plasma physics nonlinear optics quantum optics etc We believe these contributions represent that part of the research activity which has been attracting the most interest in the past year or so as well as reviews of some of the more established topics Even within this scope and given the confines imposed by the finite duration of a conference important and timely topics are inevitably left out But then there will be ICOMP IV The collection of articles in this volume combined with extensive references to related work given by the authors should provide an introduction to the major problems of the field and its state of the art The chapters have been arranged according to thematic proximity beginning with atoms and continuing on with molecules and surfaces This classification however would not cover all the subject matter even within the limited scope of the conference and of this volume

Multiphoton Processes - Proceedings Of The Sixth International Conference See Leang Chin, D K Evans, 1994-08-31 This volume of important papers by one of the world's leading astrophysicists provides a sweeping survey of the incisive and exciting applications of nuclear and particle physics to a wide range of problems in astrophysics and cosmology The prime focus of the book is on Big Bang cosmology and the role of primordial nucleosynthesis in establishing the modern consensus on the Big Bang This leads into the connection of cosmology to particle physics and the constraints put on various elementary particles by astrophysical arguments Big Bang Nucleosynthesis has also led to the argument for nonbaryonic dark matter and is thus related to the major problem in physical cosmology today namely structure formation The nuclear particle interface with astrophysics also extends to the other topics of major interest such as the age of the universe cosmic rays supernovae and solar neutrinos each of which will be discussed in some detail Each section contains historical papers current papers and frequently a popular article on the subject which provides an overview of the topic This volume is testimony to the success of the integration of nuclear and particle physics with astrophysics and cosmology and to the ingenuity of the work in this area which has earned the author numerous prestigious awards The book which is accessible to beginning graduate students should be of particular interest to researchers and students in astronomy astrophysics cosmology and gravitation and also in high energy and nuclear physics Multiphoton processes , **Multiphoton Processes** S.
