Weekly Florists' Review Gilbert Leonard Grant,1929 Florists' Review ,1903 Southern Florist and Nurseryman ,1926 Bulletin ,1895 The Weekly Florists' Review ,1903 The Mother's Recompense Edith Wharton,1925 Opening on the French Riviera among a motley community of American expatriates The Mother's Recompense tells the story of Kate Clephane and her reluctant return to New York society after being exiled years before for abandoning her husband and infant daughter Oddly enough Kate has been summoned back by that same daughter Anne now fully grown and intent on marrying Chris Fenno a war hero dilettante and social opportunist Chris's questionable intentions toward her daughter are however the least of Kate's worries since she was once and still is deeply in love with him Kate's moral quandary and the ensuing drama evoke comparison with Oedipus and Hamlet and lead to an ending that startled the mores of the day The Transition to Adulthood and Family Relations Eugenia Scabini,Elena Marta,Margherita Lanz,2007-03-12 This book explores the development of a new path of transition between adolescence and adulthood in recent generations Whereas traditionally the transition into adulthood was marked by a clear and irreversible change in condition we are now seeing a continuance in the role and influence of the family on the young adult What consequences does this have for our society Is the persistence of emotional bonds which previously loosened during adolescence inhibiting young people from developing into full adulthood The authors present a clear and in depth analysis of the theoretical framework surrounding the transition into adulthood both from a generational point of view and a relationship centred perspective The findings of international research are presented and compared across generations gender and geographical location within Europe The different research methods of family related research and family research are also distinguished and analysed This volume offers an original and multi faceted review of this topic The family is considered as an organization and the interdependencies and interconnections between its members the generations and genders investigated It offers a unique contribution to the current literature and will appeal to an international audience of researchers policy makers and educators both in academic and professional spheres ICGR 2018 International Conference on Gender Research Dr Ana Azevedo,Dr Anabela Mesquita,2018-04-12 **The Garden** ,1886 M-U-M. ,1926 Canadian Florist ,1926 **The Elson Readers, Primer** William Harris Elson,Lura E. Theriot,2021-05-11 The feminine script of early nineteenth century centered on women's role as patient long suffering mothers By mid century however their daughters faced a world very different in social and economic options and in the physical experiences surrounding their bodies In this groundbreaking study Nancy Theriot turns to social and medical history developmental psychology and feminist theory to explain the fundamental shift in women's concepts of femininity and gender identity during the course of the century from an ideal suffering womanhood to emphasis

on female control of physical self Theriot's first chapter proposes a methodological shift that expands the interdisciplinary horizons of women's history She argues that social psychological theories recent work in literary criticism and new philosophical work on subjectivities can provide helpful lenses for viewing mothers and children and for connecting socioeconomic change and ideological change She recommends that women's historians take bolder steps to historicize the female body by making use of the theoretical insights of feminist philosophers literary critics and anthropologists Within this methodological perspective Theriot reads medical texts and woman authored advice literature and autobiographies She relates the early nineteenth century notion of true womanhood to the socioeconomic and somatic realities of middle class women's lives particularly to their experience of the new male obstetrics The generation of women born early in the century in a close mother daughter world taught their daughters the feminine script by word and action Their daughters however the first generation to benefit greatly from professional medicine had less reason than their mothers to associate womanhood with pain and suffering The new concept of femininity they created incorporated maternal teaching but altered it to make meaningful their own very different experience This provocative study applies interdisciplinary methodology to new and long standing questions in women's history and invites women's historians to explore alternative explanatory frameworks
