**Philosophical Foundations of Social Research Methods:**

**Social reality and social context of social research** Malcolm Williams,2006 The philosophy of social research is a subset of the philosophy of social science but also an important subject area spanning methodology and method The articles in this collection are the best exemplars of key positions in a very wide disciplinary field Topics covered include science and art in the history of social research positivism and antipositivism language and the linguistic turn realism and anti realism theory and theory choice logic and models prediction and laws interpretation probability and complexity

**Fiction and Social Reality** Mariano Longo,2016-03-09 In spite of their differing rhetorics and cognitive strategies sociology and literature are often concerned with the same objects social relationships action motivation social constraints and relationships for example As such sociologists have always been fascinated with fictional literature This book reinvigorates the debate surrounding the utility of fiction as a sociological resource examining the distinction between the two forms of writing and exploring the views of early sociologists on the suitability of subjecting literary sources to sociological analysis Engaging with contemporary debates in this field the author explores the potential sociological use of literary fiction considering the role of literature as the exemplification of sociological concepts a non technical confirmation of theoretical insights and a form of empirical material used to confirm a set of theoretically oriented assumptions A fascinating exploration of the means by which the sociological eye can be sharpened by engagement with literary sources Fiction and Social Reality offers a set of methodological principles according to which literature can be examined sociologically As such it will appeal to scholars of sociology and literary studies with interests in research methods and interdisciplinary approaches to scholarly research

The Communicative Construction of Reality Hubert Knoblauch,2019-12-06 This volume advocates a shift from the social constructivism found in the work of Thomas Luckmann and Peter Berger to a communicative constructivism that acknowledges communication as an embodied form of action in its own right according to which social actors in engaging in communicative action construct a material social reality that guides delimits and enables actions A study of the importance of understanding the role of communication in an age in which digitization and mediatization have extended the reach of communication to a global level and brought about the emergence of the communication society The Communicative Construction of Reality shows how communication society does not merely replace modern society and its hierarchical institutions but complements it in a manner that continually results in conflicts leading to the refiguration of society As such it will appeal to scholars of sociology with interests in the sociology of knowledge communication and social theory

Making Sense of Society Alex Khasnabish,2022-05-30T00:00:00Z Grounded in the sister disciplines of sociology and anthropology this textbook is an accessible and critical introduction to contemporary social research Alex Khasnabish eschews the common disciplinary silos in favour of an integrated approach to understanding and practising critical social

research Situated in the North American context the text draws on cross cultural examples to give readers a clear sense of the diversity in human social relations It is organized thematically in a way that introduces readers to the core areas of social research and social organization and takes an unapologetically radical approach in identifying the relations of oppression and exploitation that give rise to what most corporate textbooks euphemistically identify as social problems Focusing on key dynamics and processes at the heart of so many contemporary issues and public conversations this text highlights the ways in which critical social research can contribute to exploring understanding and forging alternatives to an increasingly bankrupt violent unstable and unjust status quo

**Lean Construction 4.0** Vicente A. González,Farook Hamzeh,Luis Fernando

Alarcón,2022-12-30 This book introduces and develops the novel concept of Lean Construction 4.0 The capability of Lean Construction to effectively adapt the architecture engineering construction AEC industry to this new era of digital transformation requires a reconceptualization of the triad people processes technology as a foundation for the theoretical and practical framework of Lean Construction Therefore a shift towards Lean Construction 4.0 is required Lean Construction 4.0 is a new systems wide thinking approach where synergies and overlaps between Lean Construction and digital smart technologies go far beyond BIM to reshape the way we design manage and operate capital projects in the modern age of automation This pioneering new book brings together the views of world experts at the interface of Lean Construction and digital smart technologies in order to channel research efforts to introduce and discuss current research and practice challenges and drivers and future perspectives of Lean Construction 4.0 It is not the aim of the book to keep adding digits to the term Lean Construction to catch up with the industry revolutions as they go on Instead after reading this book it will be undeniable for readers that the triad process people technology as proposed by Lean Construction 4.0 is required to achieve an effective long lasting digital transformation of the AEC industry Thus the aim of Lean Construction 4.0 is better explained by what it evokes a future vision of construction systems comprising people processes and technology using Industry 4.0 as a basis for technological innovation in the AEC industry coupled with Lean Construction theory and practice as a jettison for improved processes and systems integration The Lean Construction 4.0 concept coined and developed in this edited book is unique and the chapters provide practitioners and academics with a provocative reflection on the theoretical and practical aspects that shape the Lean Construction 4.0 concept More importantly Lean Construction 4.0 proposes a rationale for the AEC industry not only to survive but to thrive
