Reality And Scientific Truth

Hartley Burr Alexander

Reality And Scientific Truth:

The Truth of Science Roger G. Newton, 1997 It is not a scientific truth that has come into question lately but the truth the very notion of scientific truth Bringing a reasonable voice to the culture wars that have sprung up around this notion this book offers a clear and constructive response to those who contend in parodies polemics and op ed pieces that there really is no such thing as verifiable objective truth without which there could be no such thing as scientific authority A distinguished physicist with a rare gift for making the most complicated scientific ideas comprehensible Roger Newton gives us a guided tour of the intellectual structure of physical science From there he conducts us through the understanding of reality engendered by modern physics the most theoretically advanced of the sciences With its firsthand look at models facts and theories intuition and imagination the use of analogies and metaphors the importance of mathematics and now computers and the virtual reality of the physics of micro particles *The Truth of Science* truly is a practicing scientist's account of the foundations processes and value of science To claims that science is a social construction Newton answers with the working scientist's credo A body of assertions is true if it forms a coherent whole and works both in the external world and in our minds The truth of science for Newton is nothing more or less than a relentless questioning of authority combined with a relentless striving for objectivity in the full awareness that the process never ends With its lucid exposition of the ideals methods and goals of science his book performs a great feat in service of this truth

Scientific Fact and Metaphysical Reality Robert Brandon Arnold, 1904 *The Highest Reality | A Treatise On Religion, Truth, Morality and The Purpose of Life* Paritosh M. Chakrabarti, 2024-04-23 How does one's upbringing determine one's ethical and religious views Are humans unique in this universe Is God dead as Nietzsche declared Is there any truth beyond scientific facts How different religions relate to one another What are the truth and falsehoods in various religions Are communism and nihilism more in sync with reality than religion How should we prioritise between self interest and sacrifice What should be our individual role to seek global peace Is there a higher purpose in life than just living The author a scientist scholar innovator entrepreneur and philanthropist discusses these questions in a well argued treatise sprinkled with memorable episodes and anecdotes

The Reality of the Unobservable E. Agazzi, M. Pauri, 2013-04-17 Observability and Scientific Realism It is commonly thought that the birth of modern natural science was made possible by an intellectual shift from a mainly abstract and speculative conception of the world to a carefully elaborated image based on observations There is some grain of truth in this claim but this grain depends very much on what one takes observation to be In the philosophy of science of our century observation has been practically equated with sense perception This is understandable if we think of the attitude of radical empiricism that inspired Ernst Mach and the philosophers of the Vienna Circle who powerfully influenced our century's philosophy of science However this was not the attitude of the founders of modern science Galileo for example expressed in a famous

passage of the Assayer the conviction that perceptual features of the world are merely subjective and are produced in the anima by the motion and impacts of unobservable particles that are endowed uniquely with mathematically expressible properties and which are therefore the real features of the world Moreover on other occasions when defending the Copernican theory he explicitly remarked that in admitting that the Sun is static and the Earth turns on its own axis reason must do violence to the sense and that it is thanks to this violence that one can know the true constitution of the universe
