

And so on ... : Reasoning with infinite diagrams

Solomon Feferman¹

Abstract. This paper presents examples of infinite diagrams (as well as infinite limits of finite diagrams) whose use is more or less essential for understanding and accepting various proofs in higher mathematics. The significance of these is discussed with respect to the thesis that every proof can be formalized and a “pre” form of this thesis that every proof can be presented in everyday statements-only form.

1. Introduction. A proof of a theorem in mathematics is what we require to convince ourselves and others of the truth of the statement made by the theorem. Here “truth” is taken in its prima facie sense, i.e. the notions involved in the statement of the theorem are supposed to be meaningful, and if it is to be truth *for us*, we are supposed to understand the meaning of those notions. In order to be convinced of a proof, one must follow the argument and check the various steps for ourselves, making use not only of what is given in the proof itself but what is required from background knowledge, i.e. previous statements that we have already accepted to be true on some ground or other. And that background knowledge may require understanding other notions not explicitly involved in the statement of the theorem. So both background knowledge and the understanding of meanings is an essential component of what it takes to accept a given proof. Even given that, it is possible to go through the steps of a given proof and not understand the proof itself. That is a different level of understanding, which, when successful, leads one to say, “Oh, I see!” In other words, this “really understanding the proof” is a special kind

¹ This paper is based in part on a lecture delivered to the Workshop on Diagrams in Mathematics, Paris, October 9, 2008. Slides for that talk and another one on the same topic for the Logic Seminar, Stanford, February 24, 2009 are available at http://math.stanford.edu/~feferman/papers/Infinite_Diagrams.pdf. I wish to thank Jeremy Avigad, Michael Beeson, Hourya Benis, Philippe de Rouilhan, Wilfrid Hodges, and Natarajan Shankar as well as the two referees for their comments on a draft of this article.
