**Recent Developments in Alcoholism** Marc Galanter, 1984      *Recent Developments in Alcoholism* Marc Galanter, 1989-01-31 From the President of the Research Society on Alcoholism In the last decade research concerning the causes and consequences of alcohol abuse and alcoholism has come of age We have witnessed a plethora of scientific findings that have shed light on some of the actions of alcohol at the molecular level Interesting new data have been forthcoming on the complexities of the development of tolerance to alcohol It is becoming increasingly appropriate to consider that tolerance to alcohol involves biological as well as psychological factors New scientific insights have been gained concerning the treatment of withdrawal as well as the presence of persistent withdrawal signs that may possibly be involved with relapse More recently new and compelling data indicating that alcoholism is a common familial disorder have appeared Clinical studies indicate that alcoholism is a heterogeneous disorder with multiformity in clinical symptomatology and genetic heterogeneity The heterogeneity of the clinical features and the heritability of the predisposing factors of alcoholism are currently under vigorous scientific investigation In the past several years sophisticated psychosocial studies have provided fundamental information on subjects at high risk for alcoholism Psychosocial and biological studies of families including alcoholics and subjects at high risk are likely to bring new insights to our understanding of etiological factors Moreover as a result of these studies we stand to develop better prevention initiatives and treatment approaches      Recent Developments in Alcoholism Marc Galanter, 1991-07-31      Recent Developments in Alcoholism Marc Galanter, 2012-12-06 From the President of the Research Society on Alcoholism This annual book series is a valuable resource for the alcoholism field because it provides critical and timely reviews of selected areas that have interest to both practitioners and researchers It tries to achieve a balance between psychosocial and biomedical topics and between research and patient care activities Such a mix is offered in Volume 6 The Research Society on Alcoholism whose membership embraces researchers from all disciplines that study the etiology treatment and prevention of alcoholism and alcohol related disabilities regards the support and sponsorship of this book series as one of its major missions Ting Kai Li M D President Research Society on Alcoholism From the President of the American Medical Society on Alcoholism and Other Drug Dependencies The broadening scope of clinical and scientific interest in alcohol dependence is reflected in this sixth volume of Recent Developments in Alcoholism It offers valuable reviews on important current issues in the field namely the intertwining of nature and nurture a continuing search for predictors and indicators of the disease and the social impact of alcoholism on the job and in special

populations This material should pique the interest of clinicians from all disciplines Medical social and political planners also need to turn to the expanding body of knowledge in the field of chemical dependence reflected here The volume is therefore of value to a contemporary readership and to those who will turn to it in future years Recent Developments in Alcoholism (2009) , **Recent Developments in Alcoholism** Marc Galanter,2013-11-11 From the President of the Research Society on Alcoholism The field of alcohol research has been slowly but continuously evolving taking into its domain an ever increasing array of scientific disciplines This series is designed to fill the need for a review publication that covers the broad range of research into alcohol actions and alcoholism Research in alcohol concerns social epidemiological and legal concerns in addition to biomedical and behavioral topics to greater degree than research with many other drugs A publication devoted to alcohol research should serve the broadest existing research community but perhaps more important it should also provide a means to recruit new investigators with fresh approaches to the field We can and must demonstrate that legitimate high quality research is being done but we must also highlight the opportunity for new workers to make a real impact on the problem The Research Society on Alcoholism seeks to provide such a service not only through this publication but also through other activities Richard A Deitrich Ph D **Recent Developments in Alcoholism** Marc Galanter,1986-03-31 From the President of the Research Society on Alcoholism In recent years the alcohol research field has matured and is attracting a substantial number of eager and technically sophisticated researchers There is a feeling of excitement and premonitions of breakthroughs as more and more of alcohol s actions are being detailed I however have at times been sobered by the perception that the lure of parsimonious explanations and the appeal of studying easily demonstrable effects obscure the critical issues regarding alcohol abuse and alcoholism Central questions regarding 1 the reinforcing properties of ethanol and other factors responsible for inappropriate consumption of alcohol 2 the heterogeneous characteristics both biologic and sociologic of the alcoholic population and 3 the differential predisposition of individuals to alcohol induced medical problems needed to be vigorously pursued Researchers who used animals as models for the human condition needed to become more intimately aware of the variety of factors that are of importance in the development of alcoholism in an individual On the other hand researchers studying humans needed to attempt to more clearly define and categorize diagnostic criteria and characteristics of various alcoholic populations Such categorization and continued characterization of alcoholism allows not only for a framework of concepts within which proper animal models for studies of biologic mechanisms can be developed but also allows for consideration of the most apt treatment approaches *Special Report to the U.S. Congress on Alcohol & Health* ,1987 *Recent Developments in Alcoholism* Marc Galanter,1990-01-31 *Recent Developments in Alcoholism* Marc Galanter,1997-01-31 From the President of the Research Society on Alcoholism On behalf of the Research Society on Alcoholism I am pleased to introduce this thirteenth volume of *Recent Developments in Alcoholism* about alcohol and violence Current concepts are presented in well organized sections that focus on epidemiology

neurobiology psychology and family issues It is coming increasingly clear that age gender socioeconomic circumstances and genetics affect aggressive behavior and vulnerability to alcoholism This volume contains up to date discussions of these issues Indeed the information presented here will help all alcohol researchers to identify biological and social factors that contribute to the comorbidity of alcoholism and aggression The editors and associate editors should be congratulated for bringing together such important information This volume will be a valuable resource for investigators and therapists alike

Ivan Diamond M D Ph D President Research Society on Alcoholism From the President of the American Society of Addiction Medicine The American Society of Addiction Medicine is honored to continue its sponsorship with the Research Society on Alcoholism of Recent Developments in Alcoholism The topic of alcohol and violence is a particularly timely one given the growing number of studies that are examining the relationship between the two These studies are consistent with the hypothesis that alcohol can increase aggression and contribute to both domestic and criminal violence Intoxicating blood levels of alcohol have been found to be especially prevalent in those injured in fights and assaults
