Task-Based Language Teaching in Foreign Language Contexts Ali Shehadeh,Christine A. Coombe,2012-10-17 This volume extends the Task Based Language Teaching Issues Research and Practice books series by deliberately exploring the potential of task based language teaching TBLT in a range of EFL contexts It is specifically devoted to providing empirical accounts about how TBLT practice is being developed and researched in diverse educational contexts particularly where English is not the dominant language By including contributions from settings as varied as Japan China Korea Venezuela Turkey Spain and France this collection of 13 studies provides strong indications that the research and implementation of TBLT in EFL settings is both on the rise and interestingly diverse not least because it must respond to the distinct contexts constraints and possibilities of foreign language learning The book will be of interest to SLA researchers and students in applied linguistics and TESOL It will also be of value to course designers and language teachers who come from a broad range of formal and informal educational settings encompassing a wide range of ages and types of language learners

Grammatical Theory and Metascience Esa Itkonen,1978-01-01 In this book the author analyses the nature of the science of grammar After presenting some methodological and historical background he sets forth a theory of language and of grammar showing that the science of grammar is not an empirical but a normative science comparable to logic and philosophy characterized by the use of the method of explication

The Transmission of Anglo-Norman Richard P. Ingham, Richard Ingham, 2012 This investigation contributes to issues in the study of second language transmission by considering the well documented historical case of Anglo Norman Within a few generations of the establishment of this variety its phonology diverged sharply from that of continental French yet core syntactic distinctions continued to be reliably transmitted The dissociation of phonology from syntax transmission is related to the age of exposure to the language in the experience of ordinary users of the language The input provided to children acquiring language in a naturalistic communicative setting even though one of a school institution enabled them to acquire target like syntactic properties of the inherited variety In addition it allowed change to take place along the lines of transmission by incrementation A linguistic environment combining the here and now aspects of ordinary first language acquisition with the growing cognitive complexity of an educational meta language appears to have been adequate for this variety to be transmitted as a viable entity that encoded the public life of England for centuries
