Invented by Johannes Gutenberg around 1450, the printing press of movable types allowed the edition of books in series for the first time. This revolution in the transmission of ideas and knowledge was decisive for the quick diffusion of the Renaissance thinking.

Advanced Printing Johannes Gutenberg's printing press was the first to use movable type. It was a major technological advance that allowed for the mass production of printed text.

Printing in the past Before the printing press, books were handwritten and very expensive. The printing press made books more affordable and accessible to a wider audience.

The press of printing from early woodblock printing to the modern printing press was a long process. Gutenberg's contributions were crucial in the development of the printing press.

The invention of the printing press Gutenberg's printing press was a major technological advance that allowed for the mass production of printed text.

From the world to the press

To print a text with these letters, you need a base with the type, another part with the paper and a third with the ink. The press is the device that allows you to print and produce the copies. Mounted on a table, the press is used to print a whole line of printed text on a sheet of paper.

Base plate The wooden base plate is the foundation of the press. It is used to hold the type and paper in place.

Hand crank The hand crank is used to operate the press. It is attached to the frame and allows the operator to move the type and paper.

The production of movable metallic types

Gutenberg made metallic types with great accuracy from his own designs. They provided an ideal solution for the mass production of printed text.

Print and the original The original text is used to create the type. The printing press is used to produce the copies.

Block and type The original text is used to create the type. The printing press is used to produce the copies.

Letter The letter is the basic unit of the text. It is used to create the type and is printed on the paper.

Machine The machine is used to operate the press. It is attached to the frame and allows the operator to move the type and paper.

Composition The composition is the arrangement of the type. It is used to create the text and is printed on the paper.

The appearance of the book

The invention of the printing press led to the mass production of books. This allowed for the dissemination of knowledge and the spread of the Renaissance.
