Massively Parallel Processing Applications And Development:

Massively Parallel Processing Applications and Development L. Dekker, W. Smit, J.C. Zuidervaart, 2013-10-22 The contributions of a diverse selection of international hardware and software specialists are assimilated in this book's exploration of the development of massively parallel processing (MPP). The emphasis is placed on industrial applications and collaboration with users and suppliers from within the industrial community consolidates the scope of the publication. From a practical point of view, massively parallel data processing is a vital step to further innovation in all areas where large amounts of data must be processed in parallel or in a distributed manner, e.g. fluid dynamics, meteorology, seismics, molecular engineering, image processing, parallel database processing. MPP technology can make the speed of computation higher and substantially reduce the computational costs. However, to achieve these features, the MPP software has to be developed further to create user-friendly programming systems and to become transparent for present-day computer software. Application of novel electro-optic components and devices is continuing and will be a key for much more general and powerful architectures. Vanishing of communication hardware limitations will result in the elimination of programming bottlenecks in parallel data processing. Standardization of the functional characteristics of a programming model of massively parallel computers will become established. Then efficient programming environments can be developed. The result will be a widespread use of massively parallel processing systems in many areas of application. *Massively Parallel Processing*, 1994 *Los Alamos Science*, 1994 **Computerworld**, 1992-10-12 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Written by Web 2.0 programming experts, Oracle Database AJAX PHP Web Application Development shows you how to design faster, lighter, more responsive Web applications while reducing code support and creation time. You'll learn how to develop modular AJAX and PHP code, add dynamically updated content, and implement click-to-edit and drag-and-drop functionality. You'll also get details on incorporating cutting-edge mashup, reporting, and communication features. Build robust Web applications that utilize the latest AJAX, PHP, and modularity techniques. Construct AJAX and PHP objects, controllers, iframes, and models. Simplify programming with reusable modules, open-source libraries, and templates. Optimize scalability, availability, performance, and security. Auto-refresh Web pages and execute XML calls using the HttpRequest object. Add HTML drill-down tables, DOM drag-and-drop, and click-to-edit features. Retrieve data from external sources using Remote Procedure Calls and Pear-based
