The Routledge Handbook of Disaster Risk Reduction Including Climate Change Adaptation Ilan Kelman, Jessica Mercer, JC Gaillard, 2017-09-19 The Routledge Handbook of Disaster Risk Reduction Including Climate Change Adaptation aims to provide an overview and critique of the current state of knowledge policy and practice encouraging engagement and reflection on bringing the two sectors together This long awaited and welcomed volume makes a compelling case that a common research agenda and a series of practical policies and policy recommendations can and should be put in place Over 40 contributions explore DRR including CCA in five parts The first part presents and interrogates much of the typical vocabulary seen in DRR including CCA not only pointing out the useful and not so useful dimensions but also providing alternatives and positive examples The second part explains how to move forward creating and supporting positive crossovers and connections while the third one explores some aspects of multi dimensional approaches to knowing and understanding The fourth part argues for a balanced approach to governance taking both governmental and non governmental governance as well as different scales of governance into consideration The final part of the Handbook emphasises DRR including CCA as an investment rather than a cost and connects its further implementation with livelihoods of people around the world This handbook highlights the connections amongst the processes of dealing with disasters and dealing with climate change It demonstrates how little climate change brings which is new and emphasises the strengths of placing climate change within wider contexts in order to draw on all our strengths while overcoming limitations with specialities It will prove to be a valuable guide for graduate and advanced undergraduate students academics policy makers and practitioners with an interest in disaster risk reduction and climate change Master of Disaster Frank Krake, 2017
