Perfect Graphs:

Perfect Graphs Jorge L. Ramírez-Alfonsín, Bruce A. Reed, 2001-11-28 The theory of perfect graphs was born out of a conjecture about graph colouring made by Claude Berge in 1960 That conjecture remains unsolved but has generated an important area of research in combinatorics This book Includes an introduction by Claude Berge the founder of perfect graph theory Discusses the most recent developments in the field of perfect graph theory Provides a thorough historical overview of the subject Internationally respected authors highlight the new directions seminal results and the links the field has with other subjects Discusses how semi definite programming evolved out of perfect graph theory The early developments of the theory are included to lay the groundwork for the later chapters The most recent developments of perfect graph theory are discussed in detail highlighting seminal results new directions and links to other areas of mathematics and their applications These applications include frequency assignment for telecommunication systems integer programming and optimisation

Topics on Perfect Graphs V. Chvátal, C. Berge, 1984-11-01 The purpose of this book is to present selected results on perfect graphs in a single volume These take the form of reprinted classical papers survey papers or new results

Algorithmic Graph Theory and Perfect Graphs Martin Charles Golumbic, 2014-05-10 Algorithmic Graph Theory and Perfect Graphs provides an introduction to graph theory through practical problems This book presents the mathematical and algorithmic properties of special classes of perfect graphs Organized into 12 chapters this book begins with an overview of the graph theoretic notions and the algorithmic design This text then examines the complexity analysis of computer algorithm and explains the differences between computability and computational complexity Other chapters consider the parameters and properties of a perfect graph and explore the class of perfect graphs known as comparability graph or transitively orientable graphs This book discusses as well the two characterizations of triangulated graphs one algorithmic and the other graph theoretic The final chapter deals with the method of performing Gaussian elimination on a sparse matrix wherein an arbitrary choice of pivots may result in the filling of some zero positions with nonzeros This book is a valuable resource for mathematicians and computer scientists

Algorithmic Graph Theory and Perfect Graphs Martin Charles Golumbic, 2004-02-04 Algorithmic Graph Theory and Perfect Graphs first published in 1980 has become the classic introduction to the field This new Annals edition continues to convey the message that intersection graph models are a necessary and important tool for solving real world problems It remains a stepping stone from which the reader may embark on one of many fascinating research trails The past twenty years have been an amazingly fruitful period of research in algorithmic graph theory and structured families of graphs Especially important have been the theory and applications of new intersection graph models such as generalizations of permutation graphs and interval graphs These have lead to new families of perfect graphs and many algorithmic results These are surveyed in the new Epilogue chapter in this second edition New edition of the Classic book on the topic Wonderful introduction to a rich research area Leading author in the

field of algorithmic graph theory Beautifully written for the new mathematician or computer scientist Comprehensive treatment *Perfect Codes in General Graphs* Jan Kratochvíl,1991 **Polygon Decomposition and Perfect Graphs** Arvind Raghunathan,1988 **Graphs, Hypergraphs, and Matroids II** Mieczysław Borowiecki,Zdzisław Skupień,1987 **The Indian Journal of Medical Research** ,1917 **Graphs and Hypergraphs** Claude Berge,1973 *Computing and Combinatorics* ,2005 *Applicationes mathematicae* ,1987 **Chicago Schools Journal** ,1925 **The Chicago Schools Journal** ,1926 **Illinois Schools Journal** ,1926 *Operations Research and Systems (CLAIO 2000): Probability and mathematical programming* ,2002 *Dissertation Abstracts International* ,2005 **Proceedings of the Indian National Science Academy** Indian National Science Academy,1975 *Integer Programming and Related Areas* Universität Bonn.
