## **Possible Worlds Artificial Intelligence And Narrative Theory:**

**Possible Worlds, Artificial Intelligence, and Narrative Theory** Marie-Laure Ryan, 1991 In this important contribution to narrative theory Marie Laure Ryan applies insights from artificial intelligence and the theory of possible worlds to the study of narrative and fiction For Ryan the theory of possible worlds provides a more nuanced way of discussing the commonplace notion of a fictional world while artificial intelligence contributes to narratology and the theory of fiction directly via its researches into the cognitive processes of texts and automatic story generation Although Ryan applies exotic theories to the study of narrative and to fiction her book maintains a solid basis in literary theory and makes the formal models developed by AI researchers accessible to the student of literature By combining the philosophical background of possible world theory with models inspired by AI the book fulfills a pressing need in narratology for new paradigms and an interdisciplinary perspective

**Imagination and Art: Explorations in Contemporary Theory** Keith Moser, Ananta Ch. Sukla, 2020-07-27 This transdisciplinary project represents the most comprehensive study of imagination to date The eclectic group of international scholars who comprise this volume propose bold and innovative theoretical frameworks for re conceptualizing imagination in all of its divergent forms Imagination and Art Explorations in Contemporary Theory explores the complex nuances paradoxes and aporias related to the plethora of artistic mediums in which the human imagination manifests itself As a fundamental attribute of our species which other organisms also seem to possess with varying degrees of sophistication imagination is the very fabric of what it means to be human into which everything is woven This edited collection demonstrates that imagination is the resin that binds human civilization together for better or worse

**Transmedial Narratology and Contemporary Media Culture** Jan-Noël Thon, 2016-06 Narratives are everywhere and since a significant part of contemporary media culture is defined by narrative forms media studies need a genuinely transmedial narratology Against this background Transmedial Narratology and Contemporary Media Culture focuses on the intersubjective construction of storyworlds as well as on prototypical forms of narratorial and subjective representation This book provides not only a method for the analysis of salient transmedial strategies of narrative representation in contemporary films comics and video games but also a theoretical frame within which medium specific approaches from literary and film narratology from comics studies and game studies and from various other strands of media and cultural studies may be applied to further our understanding of narratives across media

**Exploited, Empowered, Ephemeral** Denise Burkhard, 2023-07-10 Childhood in neo Victorian fiction for both child and adult readers is an extremely multifaceted and fascinating field This book argues that neo Victorian fiction projects multiple competing visions of childhood and suggests that they can be analysed by means of a typology the childhood scale which provides different categories along the lines of power relations and literary possible worlds theory The usefulness of both is exemplified by detailed discussions of Philippa Pearce s Tom s Midnight Garden 1958 Eva Ibbotson s Journey to the River Sea 2001 Sarah Waters Fingersmith 2002
