Worldwide Uma A. Segal, Doreen Elliott, Nazneen S. Mayadas, 2010-01-19 The ease of transportation the opening of international immigration policies the growing refugee movements and the increasing size of unauthorized immigrant populations suggest that immigration worldwide is a phenomenon of utmost importance to professionals who develop policies and programs for or provide services to immigrants Immigration occurs in both the wealthy nations of the global North and the poorer countries of the global South it involves individuals who arrive with substantial human capital and those with little It has far reaching implications for a nation s economy public policies social and health services and culture The purpose of this volume therefore is to explore current patterns and policies of immigration in key countries and regions across the globe and analyze the implications for these countries and their immigrant populations Each of its chapters written by an international and interdisciplinary group of experts explores how country conditions policies values politics and attitudes influence the process of immigration and subsequently affect immigrants migration and the nation itself No other volume explores the landscape of worldwide immigration as broadly as this does with sweeping coverage of countries and empirical research together with an analytic framework that sets the context of human migration against a wide backdrop of experiential factors that take shape long before an immigrant enters a host country At once a sourcebook and an applied model of immigration studies Immigration Worldwide is a valuable reference for scholars and students seeking a wide ranging yet nuanced survey of the key issues salient to debates about the programs and policies that best serve immigrant populations and their host countries

International Migration Jonathon Wayne Moses, 2006 Jonathon Moses makes moral political and economic arguments in favor of the free mobility of human beings across national borders Pointing to the importance of immigration to the success of many nations he shows that Europe itself now faces a falling population and has over the past fifty years actively encouraged huge immigration from other countries There is near consensus across the political spectrum that the free movement of goods and free movement of capital are good for economies and therefore should apply to people as well
