Of One Mind:

Of One Mind and Of One Government Kevin Kokomoor,2019-02-01 In *Of One Mind and Of One Government* Kevin Kokomoor examines the formation of Creek politics and nationalism from the 1770s through the Red Stick War when the aftermath of the American Revolution and the beginnings of American expansionism precipitated a crisis in Creek country. The state of Georgia insisted that the Creeks sign three treaties to cede tribal lands. The Creeks objected vigorously igniting a series of border conflicts that escalated throughout the late eighteenth century and hardened partisan lines between pro American pro Spanish and pro British Creeks and their leaders. Creek politics shifted several times through historical contingencies self interests changing leadership and debate about how to best preserve sovereignty a process that generated national sentiment within the nascent and imperfect Creek Nation. Based on original archival research and a revisionist interpretation Kokomoor explores how the state of Georgia s increasingly belligerent and often fraudulent land acquisitions forced the Creeks into framing a centralized government appointing heads of state and assuming the political and administrative functions of a nation state. Prior interpretations have viewed the Creeks as a loose confederation of towns but the formation of the Creek Nation brought predictability stability and reduced military violence in its domain during the era.

Muses of One Mind Wesley Trimpi,2009-11-01 Describing how ancient discussions of literature borrowed their descriptive terms from mathematical philosophical and rhetorical disciplines Wesley Trimpi shows that when any one of these three types of discourse was sacrificed to one or both of the other two the resulting imbalance proved destructive to literary discourse. Preoccupation with exhortatory rhetorical intention reduced literary works to displays of eloquence or ideology preoccupation with cognitive philosophical intention led to didacticism and preoccupation with formal mathematical excellence resulted in aesthetic expression for its own sake. In tracing the relationship of the three disciplines to literary discourse through the Middle Ages this work diagnosis the increase of such reductive preoccupations after the Neoplatonic reconstruction of classical literary theory. Since 1600 these imbalances have continued to exist obscured by proliferating and competing theories and methods of literary interpretation. Taking *theoria* in the ancient sense of inclusive observation Professor Trimpi points to an alternative to contemporary critical orthodoxies.

One Mind Larry Dossey,2013 Emerging studies have shown that the One Mind isn t just an idea it s a reality. In this book Larry Dossey shares compelling research that supports the One Mind concept. These cases include experiences of shared thoughts emotions and physical sensations with a distant individual communication between humans and sentient nonhumans such as pets large groups of animals flocks schools herds behaving in highly coordinated ways acquisition of previously unknown knowledge from a person who has died hidden or lost objects found through mental means alone and direct contact with a transcendent domain through near death experiences. Through engaging stories fascinating case studies and brilliant insights from great thinkers throughout history *One Mind* explores the outer reaches of human consciousness. In it you will discover a new way to

interpret the great mysteries of our experience and learn how to develop the empathy necessary to engender more love peace and collective awareness The result is a rich new understanding of what it means to be human and a renewed hope that we can successfully confront the challenges we face at this crossroads in human history Consciousness As Representing One's Mind Richard Brown,2025 The science of consciousness is now at the point where we need to evaluate the theories of consciousness currently on offer Higher order theories of consciousness having originated in philosophy rather than science are at this point not well understood Even worse it is often not clear what would or would not count as an empirical test of these kinds of theories Richard Brown here carefully presents and defends a novel higher order theory of consciousness and compares it to the existing theories with an emphasis on empirical falsification Brown affectionately calls his novel theory the HOROR Higher Order Representation of a Representation theory After presenting and defending the HOROR theory he turns to situating this theory in the contemporary landscape of higher order theories Throughout he emphasizes the extent to which empirical results would constitute a challenge to higher order theories Along the way he develops a new taxonomy for higher order theories and uses it to classify the existing varieties of higher order theories
