Monitoring For Fine Particulate Matter

Brian Andrew Cochran

Monitoring For Fine Particulate Matter:

Monitoring for Fine Particulate Matter Elisa Eiseman,1998 Particulate matter PM dust dirt smoke soot and liquid droplets comes from a variety of sources and is a mixture of many pollutants made up of several different chemical species Recent evidence about health effects and the fundamental physical and chemical differences between fine and coarse PM prompted the EPA to set new standards Monitoring to determine whether an area has met these standards requires a comprehensive approach that combines analytical techniques to assess mass and chemical composition with an integrated network of ambient and source PM monitors

Ambient Air Monitoring of Fine Particulate Matter at Hill Air Force Base, Utah and the Influence of Mobile Sources Glenn Roger Palmer,1999 *Fine Particulate Matter Monitoring Technologies* Elisa Eiseman,Critical Technologies Institute (U.S.),Rand Corporation,United States. Office of Science and Technology Policy,1997 Measurement of ambient particulate matter PM mass and chemical composition is important for source attribution studies of health and welfare effects and determination of compliance with standards A comprehensive approach to PM monitoring requires a combination of analytical techniques to assess mass and chemical composition and an integrated network of ambient and stack source PM monitors There are several commercially available devices that can continuously monitor PM mass However none of these methods have been approved by the EPA since most of these devices do not directly measure mass In addition chemical analysis of PM is costly and difficult since existing technologies are not capable of continuous sampling monitoring for chemical composition Therefore the next generation of PM monitors should be multi functional instruments capable of continuous real time monitoring of both PM mass and chemical composition In addition they will need to address several barriers to their use including cost complicated calibration and verification systems and cumbersome installation and maintenance procedures
