Pure Corba A Code Intensive Premium Reference

Jon Siegel

Pure Corba A Code Intensive Premium Reference:

Pure Corba Fintan Bolton, 2001-07-16 PURE CORBA 3 is a premium code intensive reference for professional developers. It focuses on the core specification for CORBA 3 and contains conceptual overview of CORBA 3 CORBA techniques programming reference that contains thousands of lines of commercial quality code examples in both C and Java the two most popular languages among CORBA developers concise reference to the most important parts of the specification

Implementing Distributed Systems with Java and CORBA Markus Aleksy, Axel Korthaus, Martin Schader, 2005-06-22 This book provides graduate students and practitioners with knowledge of the CORBA standard and practical experience of implementing distributed systems with CORBA's Java mapping. With tested code examples that will run immediately

Software Engineering for Experimental Robotics Davide Brugali, 2007-02-15 This book reports on the concepts and ideas discussed at the well attended ICRA2005 Workshop on Principles and Practice of Software Development in Robotics held in Barcelona Spain April 18 2005. It collects contributions that describe the state of the art in software development for the Robotics domain. It also reports a number of practical applications to real systems and discuss possible future developments

On the Move to Meaningful Internet Systems 2004: CoopIS, DOA, and ODBASE Zahir Tari, 2004-10-11 A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection. A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience. These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself. In fact their attendance was largely sponsored by the other participants. If evaluated as successful it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum. All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting applications pulled created by the Internet and the so called Semantic Web. For DOA 2004 the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004 it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004 the main topic was the interaction of such technologies and methods with management issues such as occurs in networked organizations. These subject areas naturally overlap and many submissions in fact also treat envisaged mutual impacts among them.

On the Move to Meaningful Internet Systems 2005: CoopIS, DOA, and ODBASE R. Meersman, 2005-10-27 This two volume set LNCS 3760 3761 constitutes the refereed proceedings of the three confederated conferences CoopIS 2005 DOA 2005 and ODBASE 2005 held as OTM 2005 in Agia Napa Cyprus in October November 2005. The 89 revised full and 7 short papers presented together with 3 keynote speeches were carefully reviewed and selected from a total of 360 submissions. Corresponding with the three OTM 2005 main conferences CoopIS DOA and

ODBASE the papers are organized in topical sections on workflow workflow and business processes mining and filtering petri nets and process management information access and integrity heterogeneity semantics querying and content delivery Web services agents security integrity and consistency chain and collaboration management Web services and service oriented architectures multicast and fault tolerance communication services techniques for application hosting mobility security and data persistence component middleware java environments peer to peer computing architectures aspect oriented middleware information integration and modeling query processing ontology construction metadata information retrieval and classification system verification and evaluation and active rules and Web services

Computer and Information Sciences - ISCIS 2005 Pinar Yolum,2005-10-17 This book constitutes the refereed proceedings of the 20th International Symposium on Computer and Information Sciences ISCIS 2005 held in Istanbul Turkey in October 2005 The 92 revised full papers presented together with 4 invited talks were carefully reviewed and selected from 491 submissions The papers are organized in topical sections on computer networks sensor and satellite networks security and cryptography performance evaluation e commerce and Web services multiagent systems machine learning information retrieval and natural language processing image and speech processing algorithms and database systems as well as theory of computing
