## Remembering Osiris:

ReMembering Osiris Tom Hare,1999 The story of Osiris is one of the central cultural myths of ancient Egypt a story of dismemberment and religious passion that also exemplifies attitudes about personal identity sexuality and the transfer of royal power It is moreover a story of death and the overcoming of death and in this it lies at the center of our own means of engagement with ancient Egypt ReMembering Osiris takes as its focus this tale as it is recorded in Egyptian texts and memorialized on the walls of temples and tombs Since such a focus is attainable only through Egyptian representational systems especially hieroglyphs the book also engages broader questions of writing and visual representation decipherment controversies about the ideograph and the relation between visual images and writing

**ReMembering Osiris** Tom Hare,2022 The texts and visual arts of ancient Egypt reveal a persistent and sophisticated engagement with problems of language the body and multiplicity This innovative book shows how these issues were represented in ancient Egypt and how Egyptian approaches to them continue to influence the way we think about them today The story of Osiris is one of the central cultural myths of ancient Egypt a story of dismemberment and religious passion that also exemplifies attitudes about personal identity sexuality and the transfer of royal power It is moreover a story of death and the overcoming of death and in this it lies at the center of our own means of engagement with ancient Egypt This book focuses on the story of Osiris as it is recorded in Egyptian texts and memorialized on the walls of temples and tombs Since such a focus is attainable only through Egyptian representational systems especially hieroglyphs the book also engages broader questions of writing and visual representation decipherment controversies about the ideograph and the relation between visual images and writing This analysis of Egyptian representation leads to a consideration of the phallic body and the problem of multiplicity in Egyptian religion two nets of Egyptian discourse that though integrated into the writing system itself reach toward broader Egyptian discourses of gender subjectivity piety and cosmogenesis The concluding chapter considers in specific terms the question of a persisting Egyptian legacy in the West from the Greeks and Israelites to Augustine Hegel and Lacan

Bové, 2000 The essays collected in this issue of *boundary 2* were written in response to a call for papers that would treat the contemporary university in various regions and stages of formation around the world in light of the interaction between local and global realities Underlying this project is the assumption that profound changes in economy and world organization transform the function and value of universities in tension not only with the regional histories and forces in which particular universities function but also with what used to be called the idea of the university The authors of these essays approach this topic in two ways some present the history and current situation of the university in a given place and politics and some write of the new university's political economy as the state withdraws support for higher education and hands the institutions over to entrepreneurial and transnational corporate culture None of these essays defends the idea that the university pursues knowledge for its own sake Yet there is a tinge of nostalgia for this idea or at least for the idea that the university's task is to educate to destroy bias to cultivate Of course such an idea remains the public justification for the existence of the university especially in the advanced capitalist societies whose higher classes benefit the most from the globalization of economic production **Antiquity** Osbert Guy Stanhope Crawford, 1999 Includes section [Reviews](#) [Antiquity](#) Manuel Vaquero, A.J.
