Imported water has transformed the Golden State s environment and quality of life In the last one hundred years land ownership patterns and real estate boosterism have dramatically altered both urban and rural communities across the entire state The key has been water from the Eastern Sierra the Colorado River and finally Northern California rivers Whoever brings the water brings the people wrote engineer William Mulholland whose leadership began the process of water irrigating unlimited growth Using first person voices of Californians to reveal the resulting changes Carle concludes that the new millennium may be the time to stop drowning the California dream With extensive use of oral histories contemporary newspaper articles and autobiographies Carle provides a rich exploration of the historic change in California showing that

imported water has shaped the pattern of population growth in the state Water choices remain the primary tool he claims for shaping California s future The state s damaged environment and reduced quality of life can be corrected if Californians will step out of their historic pattern and embrace limited water supplies as a fact of life in this naturally dry region Library Journal ,1987 **New Urban News** ,1997
