## **Religion Rationality:**

**Rationality and Religion** Roger Trigg, 1998      Rationality and Religious Commitment Robert Audi, 2011-09-22

Rationality and Religious Commitment shows how religious commitment can be rational and describes the place of faith in the postmodern world. It portrays religious commitment as far more than accepting doctrines; it is viewed as a kind of life, not just as an embrace of tenets. Faith is conceived as a unique attitude, irreducible to belief but closely connected with both belief and conduct and intimately related to life's moral, political, and aesthetic dimensions. Part One presents an account of rationality as a status attainable by mature religious people, even those with a strongly scientific habit of mind. Part Two describes what it means to have faith, how faith is connected with attitudes, emotions, and conduct, and how religious experience may support it. Part Three turns to religious commitment and moral obligation and to the relation between religion and politics. It shows how ethics and religion can be mutually supportive, even though ethics provides standards of conduct independently of theology. It also depicts the integrated life possible for the religiously committed: a life with rewarding interactions between faith and reason, religion and science, and the aesthetic and the spiritual. The book concludes with two major accounts. One explains how moral wrongs and natural disasters are possible under God, conceived as having the knowledge, power, and goodness that make such evils so difficult to understand. The other account explores the nature of persons, human and divine, and yields a conception that can sustain a rational theistic worldview even in the contemporary scientific age.

Rationality and Religious Theism Joshua L. Golding, 2017-11-22. Throughout the ages, one of the central topics in philosophy of religion has been the rationality of theistic belief. This book proposes that parties on both sides of this debate might shift their attention in a different direction by focusing on the question of whether it is rational to be a religious theist. Explaining that having theistic beliefs is primarily a cognitive affair but being a religious theist involves a whole way of life that includes one's beliefs, Golding argues that it can be pragmatically rational to be a religious theist even if the evidence for God's existence is minimal. The argument is applied to the case of Judaism, articulating what is involved in religious Judaism and arguing that it is rationally defensible to be a religious Jew. The book concludes with a discussion of whether a similar argument might be constructed for other versions of religious theism, such as Christianity or Islam, and for non-theistic religions such as Taoism or Buddhism. Joshua Golding offers a carefully wrought explanation of how it can be rational for someone to live a religious life, in particular but not necessarily only a traditional Jewish life.

**Religion and Rationality** Jürgen Habermas, 2014-10-15. This important new volume brings together Habermas's key writing on religion and religious belief. Habermas explores the relations between Christian and Jewish thought on the one hand and the Western philosophical tradition on the other. In so doing, he examines a range of important figures, including Benjamin Heidegger, Johann Baptist Metz, and Gershom Scholem. In a new introduction written especially for this volume, Eduardo Mendieta places Habermas's engagement with religion in the context of his work as a whole. Mendieta also discusses Habermas's writings in

relation to Jewish Messianism and the Frankfurt School showing how the essays in Religion and Rationality one of which is translated into English for the first time foreground an important yet often neglected dimension of critical theory The volume concludes with an original extended interview also in English for the first time in which Habermas develops his current views on religion in modern society This book will be of great interest to students and scholars in theology religious studies and philosophy as well as to all those already familiar with Habermas work

**Faith, Rationality and the Passions** Sarah Coakley, 2012-07-20 Faith Rationality and the Passions presents a fresh and original examination of the relation of religious faith philosophical rationality and the passions Contributions see leading scholars refute the widely held belief that religious Enlightenment forced passion and reason apart Leading Philosophical experts offer new research on the relation of faith reason and the passions in classic and Enlightenment figures Overturns the widely held presumption that the Enlightenment was responsible for creating a gulf between reason and passion Presents original and innovative research on the importance of the late 19th century creation of the category of emotion and its striking difference from classic ideas of passion Brings together secular science and philosophy of emotion with philosophical theology to seek a new integration of belief emotion and reason

**Faith, Freedom, and Rationality** Jeff Jordan, Daniel Howard-Snyder, 1996 The philosophy of religion once considered a deviation from an otherwise analytically rigorous discipline has flourished over the past two decades This collection of new essays by twelve distinguished philosophers of religion explores three broad themes religious attitudes of belief acceptance and love human and divine freedom and the rationality of religious belief

Is Faith Rational? Wessel Stoker, 2006 Is faith rational Some respond by providing proofs for God's existence Others hold that no reasons for the Christian faith can be given This book discusses different ways of accounting for faith i.e. classical apologetics the transcendental view that faith is part of human nature and the view that argues for the rationality of faith on the basis of direct perceptions of God that appear to be objective The author subsequently proposes a rational accounting for the Christian faith in our secularized and religiously pluralistic society His starting point is the lasting religious experience of believers in everyday life He also discusses the question of how this accounting for faith can function in a world of both secular worldviews and other religions Religious experience is not subjective or arbitrary but rational In these experiences human beings are involved with God Religious experience can be described phenomenologically as an experience that transcends our capacities God reveals himself to people primarily in narratives Narratives have a rational structure and the Gospel narratives provide in narrative form arguments for faith The assent to faith involves the whole person and stamps his life story and conduct Assent to faith is thus affective but that does not exclude its being rational The positive reason for faith lies in experience itself There are no reasons for faith outside the faith itself but this does not mean that there are no points of contact in human existence for the

Christian faith [Theological Philosophy](#) Lydia Schumacher,2016-02-17 For much of the modern period theologians and philosophers of religion have struggled with the problem of proving that it is rational to believe in God Drawing on the thought of Thomas Aquinas Theological Philosophy seeks to overturn the longstanding problem of proving faith's rationality and to establish instead that rationality requires to be explained by appeals to faith Building on a constructive argument developed in a companion book *Rationality as Virtue* Lydia Schumacher advances the conclusion that belief in the God of Christian faith provides an exceptionally robust rationale for rationality and is as such intrinsically rational At the same time Schumacher overcomes a common tendency to separate spiritual from ordinary life and construes the latter as the locus of proof for the rationality of Christian faith **Rationality in Science, Religion, and Everyday Life** Mikael Stenmark,2016-09-15 Mikael Stenmark examines four models of rationality and argues for a discussion of rationality that takes into account the function and aim of such human practices as science and religion *The Rationality of Belief and the Plurality of Faith* Thomas D.
