Making Of Cities:

The Art of City Making Charles Landry, 2012-05-16 City making is an art not a formula The skills required to re enchant the city are far wider than the conventional ones like architecture engineering and land use planning There is no simplistic ten point plan but strong principles can help send good city making on its way The vision for 21st century cities must be to be the most imaginative cities for the world rather than in the world This one change of word from in to for gives city making an ethical foundation and value base It helps cities become places of solidarity where the relations between the individual the group outsiders to the city and the planet are in better alignment Following the widespread success of *The Creative City* this new book aided by international case studies explains how to reassess urban potential so that cities can strengthen their identity and adapt to the changing global terms of trade and mass migration It explores the deeper fault lines paradoxes and strategic dilemmas that make creating the good city so difficult *Making Cities Global* A. K. Sandoval-Strausz, Nancy H. Kwak, 2018 *Making Cities Global* argues that combining urban history with a transnational approach leads to a better understanding of our increasingly interconnected world In order to achieve prosperity peace and sustainability in metropolitan areas in the present and into the future we must understand their historical origins and development

The Challenge Of Making Cities Liveable In East Asia John Wong, Liang Fook Lye, 2016-06-03 The rate of urbanisation will accelerate in the years ahead The massive influx of people to cities will result in the demand for more services expending more resources and generating more waste The forces of globalisation and better connectivity will hasten this urbanisation process Although the developed and developing countries in East Asia are at different stages of development they have to grapple with the common challenge of improving the quality of life for urban residents and making cities liveable This book brings together a collection of articles that traces the process of urbanisation in selected countries in East Asia including the achievements and challenges encountered It seeks to promote the sharing of best practices and experiences that can be a reference for governments and relevant stakeholders to facilitate the process of urbanisation that brings about the greatest benefits to residents and lessens the negative impact on the environment
