Making and Using the Atomic Bomb Mark McKain,2003 Presents a collection of narratives essays and reminiscences providing eyewitness accounts of the events surrounding the creation and deployment of the atomic bomb The Manhattan Project Francis George Gosling,1999 A history of the origins and development of the American atomic bomb program during WWII Begins with the scientific developments of the pre war years Details the role of the U S government in conducting a secret nationwide enterprise that took science from the laboratory and into combat with an entirely new type of weapon Concludes with a discussion of the immediate postwar period the debate over the Atomic Energy Act of 1946 and the founding of the Atomic Energy Commission Chapters the Einstein letter physics background 1919 1939 early government support the atomic bomb and American strategy and the Manhattan district in peacetime Illustrated **The Making of the Atomic Bomb** Richard Rhodes,2012-06-12 Traces the development of the atomic bomb from Leo Szilard s concept through the drama of the race to build a workable device to the dropping of the bomb on Hiroshima *Living with the Bomb: American and Japanese Cultural Conflicts in the Nuclear Age* Laura E. Hein,Mark Selden,2015-02-18 The development and use of the atomic bombs at Hiroshima and Nagasaki number among the formative national experiences for both Japanese and Americans as well as for 20th century Japan US relations This volume explores the way in which the bomb has shaped the self image of both peoples **The Manhattan Project** Al Cimino,2015-07-14 The ramifications of the Manhattan Project are still with us to this day The atomic bombs that came out of it brought an end to the war in the Pacific but at a heavy loss of life in Japan and the opening of a Pandora s box that has tested international relations This book traces the history of the Manhattan Project from the first glimmerings of the possibility of such a catastrophic weapon to the aftermath of the bombings of Hiroshima and Nagasaki It profiles the architects of the bomb and how they tried to reconcile their personal feelings with their ambition as scientists It looks at the role of the politicians and it includes first hand accounts of those who experienced the effects of the bombings **Orientation Fact Sheets** ,1947 Current Biography ,1948 **Armed Forces Talk** , Congressional Record United States. Congress,1945 *The Living Church* ,1946 *Helping the United Nations by Making Everybody's World Safe* Frank Charles Laubach,1947 Nuclear Shadowboxing: Contemporary Threats from Cold War Weaponry; Volume 1: Cold War Redux Alexander DeVolpi,Vladimir E. Minkov,Vadim A. Simonenko,George S. Stanford,2004 **American Airpower Strategy in Korea, 1950-1953** Conrad C. Crane,2000 The Korean War was the first armed engagement for the newly formed U S Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes

and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force's contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower's performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support for ground troops and he tells how interactions between army and air force generals shaped the air force's mission and strategy He also addresses misunderstandings about plans to use nuclear biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war The book considers not only the actual air effort in Korea but also its ramifications The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict a position that left it unprepared to fight the next limited war in Vietnam As America observes the fiftieth anniversary of its initial engagement in Korea Crane's book is an important reminder of the lessons learned there And as airpower continues to be a cornerstone of American defense this examination of its uses in Korea provides new insights about the air force's capabilities and limitations

The Pentagon and the Presidency Dale Roy Herspring,2005 A fascinating account from the military's perspective of the historically tense and at times outright antagonistic relations between senior military leaders and American presidents and their advisors Closely examines and grades the impact of presidential styles on the military's view of the president

Secret Weapons and World War II Walter E. Grunden,2005 Grunden's analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan's failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East **BOOK JACKET**

Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner,1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom
