Directions for a New North America David G. Waller, Robert L. D'Avanzo, Douglas M. Lambert, Council of Logistics Management (U.S.), 1995 **Smelter Smoke in North America** John D. Wirth, 2000 Air pollution challenges nations

sharing common borders to balance economic needs with protecting citizens and the environment across jurisdictions By examining landmark cases on the two borders John Wirth shows how environmental diplomacy citizen action at the grassroots level and the role of science industry and the law converged bringing Canada the United States and Mexico to the threshold of today s continental approaches to pollutant pathways Wirth first examines the famous Trail smelter conflict of 1927 1941 This precedent setting case which pitted U S farmers against the Canadian smelter resulted in the doctrine that in cases of transborder damage the polluter must pay Although the farmers were modestly compensated and the British Columbia based smelter cooperated to control pollution Wirth reveals the real significance of the decision U S industries shared with the Canadians a common interest to resolve the case in a manner that would allow them to continue to pollute freely across international borders with minimal regulation Wirth then turns to the Gray Triangle confrontations of the 1980s in which the new instruments of the Clean Air Act and cooperative policies developed by the Mexican and U S governments established an entirely new climate for citizen action resulting in the closing of an American smelter in Arizona and the

imposition of stricter standards on two Mexican smelters in Sonora Although the Trail precedent favored industry the Gray Triangle resolution signaled that the needs of industry and the public interest were now in better balance Drawing on extensive interviews and previously untapped archives Smelter Smoke in North America provides new analysis of the development of a North American institutional response to continental air pollution It chronicles how industry developed a continental perspective in a shared regional space the mineralized West and how successful efforts of governments and citizens to protect the environment evolved

Transnational Democracy in Critical and Comparative Perspective
Bruce Morrison, 2003 This book brings together two themes of enormous current intellectual and emotional impact democracy and its institutional forms and the globalization of economic social and cultural affairs The volume pursues the meaning of transnational democracy through an examination of the sources of novel democratic potential at multiple levels from the local to the global To a very great extent this task depends upon a critical analysis of state and nation formation state level democratization and transnational social movement emergence In engaging these complex issues the authors find themselves drawn into intellectual and geographic territories as diverse as European institutional and intellectual history North American and European trade agreements Canadian constitutionalism African state society relations and debates regarding the democratic peace While the coverage is global in its attention to transnational institutions and international non governmental organizations for instance it is also genuinely regional as it seeks out and critically assesses the potential building blocks for a more appropriately democratic future in the varied forms that the institutionalization of globalization assumes around the world
