Objective Coordination In Multiagent System Engineering:

Objective Coordination in Multi-Agent System Engineering Michael Schumacher,2003-06-29 Based on a suitably defined coordination model distinguishing between objective inter agent coordination and subjective intra agent coordination this book addresses the engineering of multi agent systems and thus contributes to closing the gap between research and applications in agent technology After reviewing the state of the art the author introduces the general coordination model ECM and the corresponding object oriented coordination language STL The practicability of ECM STL is illustrated by the simulation of a particular collective robotics application and the automation of an e commerce trading system Situated at the intersection of behavior based artificial intelligence and concurrent and distributed systems this monograph is of relevance to the agent R D community approaching agent technology from the distributed artificial intelligence point of view as well as for the distributed systems community

Environments for Multi-Agent Systems Danny Weyns,H. Van Dyke Parunak,Fabien Michel,2005-02-10 This modern field of multi agent systems has developed from two main lines of earlier research its practitioners generally regard it as a form of distributed artificial intelligence whereas some researchers have persistently advocated ideas from the field of artificial life AI agents and their designers usually take the environment for agent interaction as granted From the ALife perspective and for ALife agents the environment for interaction is an active participant in agent dynamics a first class member of the overall systems This book originates from the First International Workshop on Environments for Multi Agent Systems E4MAS 2004 held in New York NY USA in July 2004 as a satellite workshop of AAMAS 2004 The 13 carefully selected reviewed and revised papers presented together with an introductory survey article of close to 50 pages are organized in topical sections on conceptual models language for design and specification simulation and environments mediated coordination and applications
