Ocean Biome:

The Ocean Biome Kathryn Smithyman, Bobbie Kalman, 2003 The world's largest biome oceans and seas cover three quarters of the Earth's surface Full color illustrations dazzling photography and easy to understand text explain the four zones of the marine biome their plants and animals coral reefs and estuaries the importance of oceans to the Earth and how they are in danger Natural Capital and Exploitation of the Deep Ocean Maria Baker, Eva Ramirez-Llodra, Paul Tyler, 2020-08-28 The deep ocean is by far the planet's largest biome and holds a wealth of potential natural assets Human exploitation of the deep ocean is rapidly increasing whilst becoming more visible to many through the popular media particularly film and television The scientific literature of deep sea exploitation and its effects has also rapidly expanded as a direct function of this increased national and global interest in exploitation of deep sea resources both biological e.g. fisheries genetic resources and non biological e.g. minerals oil gas methane hydrate At the same time there is a growing interest in deep sea contamination including plastics with many such studies featured in high profile scientific journals and covered by global media outlets However there is currently no comprehensive integration of this information in any form and these topics are only superficially covered in classic textbooks on deep sea biology This concise and accessible work provides an understanding of the relationships between biodiversity and ecosystem functioning both at the seafloor and in the water column and how these might be affected as a result of human interaction exploitation and ultimately environmental change It follows a logical progression from geological and physical processes ecology biology and biogeography to exploitation management and conservation Natural Capital and Exploitation of the Deep Ocean is aimed at marine biologists and ecologists oceanographers fisheries scientists and managers fish biologists environmental scientists and conservation biologists It will also be of relevance and use to a multi disciplinary audience of fish and wildlife agencies NGOs and government departments involved in deep sea conservation and management What is a Biome?
