Y. Ohama

Make It With Recycled Pb:

Disposal and Recycling of Organic and Polymeric Construction Materials Y. Ohama,2004-03-01 This volume contains a comprehensive selection of the papers presented at the RILEM International Workshop on the subject held in Tokyo Japan in 1995 Invited experts from Japan USA Europe and the Far East reviewed the latest research in the disposal and recycling of construction materials such as plastics rubber asphalt wood and paper *Recycling and Reuse in the Roman Economy* Chloë N. Duckworth,Andrew Wilson,2020-09-10 The recycling and reuse of materials and objects were extensive in the past but have rarely been embedded into models of the economy even more rarely has any attempt been made to address the scale of these practices Recent developments including the use of large datasets computational modelling and high resolution analytical chemistry are increasingly offering the means to reconstruct recycling and reuse and even to approach the thorny issue of quantification This volume is the first to bring together these new approaches and the first to present a consideration of recycling and reuse in the Roman economy taking into account a range of materials and using a variety of methodological approaches It presents integrated cross referential evidence for the recycling and reuse of textiles papyrus statuary and building materials amphorae metals and glass and examines significant questions about organization value and the social meaning of recycling *Glass Making in the Greco-Roman World* Patrick Degryse,2015-01-21 New insights into the trade and processing of mineral raw materials for glass making Free ebook at OAPEN Library www.oapen.org This book presents a reconstruction of the Hellenistic Roman glass industry from the point of view of raw material procurement Within the ERC funded ARCHGLASS project the authors of this work developed new geochemical techniques to provenance primary glass making They investigated both production and consumer sites of glass and identified suitable mineral resources for glass making through geological prospecting Because the source of the raw materials used in the manufacturing of natron glass can be determined new insights in the trade of this material are revealed While eastern Mediterranean glass factories were active throughout the Hellenistic to early Islamic period western Mediterranean and possibly Italian and North African sources also supplied the Mediterranean world with raw glass in early Roman times By combining archaeological and scientific data the authors develop new interdisciplinary techniques for an innovative archaeological interpretation of glass trade in the Hellenistic Roman world highlighting the development of glass as an economic material Contributors Annelore Blomme KU Leuven Sara Boyen KU Leuven Dieter Brems KU Leuven Florence Cattin Universit de Bourgogne Mike Carremans KU Leuven Veerle Devulder KU Leuven UGent Thomas Fenn Yale University Monica Ganio Northwestern University Johan Honings KU Leuven Rebecca Scott KU Leuven **Inorganic Contaminants and Radionuclides** Ravi Naidu,2023-10-17 Inorganic Contaminants and Radionuclides is a single reference covering common inorganic contaminants in detail including their distribution in the environment challenges linked to management geogenic sources anthropogenic sources exposure and effects international agreements and legislation relating

to the contaminant remediation options and global case studies In addition the book provides summaries of contaminated sites and key details about contaminants to present a more comprehensive understanding and improve remediation and management practices The book s clear consistent organization makes it a valuable resource for researchers students and practitioners working in environmental science environmental management and environmental engineering One of the major constraints to assessing and remediating contaminated sites is the lack of awareness of the extent and severity of contaminated sites amongst the community regulators policymakers industry operators university graduates and environmental managers This book helps to manage these constraints Provides a one stop reference on the nature and properties of inorganic contaminants including a transdisciplinary approach to managing contaminated sites Includes global case studies covering contaminated site assessment management and remediation Presents in depth research and data on specific contaminants with a separate chapter for each contaminant

Solid Waste Management, Available Information Materials ,1973 *Indexes* United States. Environmental Protection Agency,1983 *Available Information Materials on Solid Waste Management* United States. Environmental Protection Agency,1980 *Structure-Property Relations in Nonferrous Metals* Alan Russell,Kok Loong Lee,2005-07-08 This junior senior textbook presents fundamental concepts of structure property relations and a description of how these concepts apply to every metallic element except iron Part One of the book describes general concepts of crystal structure microstructure and related factors on the mechanical thermal magnetic and electronic properties of nonferrous metals intermetallic compounds and metal matrix composites Part Two discusses all the nonferrous metallic elements from two perspectives First it explains how the concepts presented in Part One define the properties of a particular metallic element and its alloys Second is a description of the major engineering uses of each metal This section features sidebar pieces describing particular physical property oddities engineering applications and case studies An Instructor s Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department An Instructor s Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department
