My Revelations of Love Fabian D. Falls, 2007-10 As indicated in the title this is a study in the historical evolution of the major faiths of mankind and their religious beliefs It is not a study to prove who is right and who is wrong As such it certainly has a different approach to the subject The layout of the subject may not depict the usual traditional approach observed in religious works but it certainly preserves its true historical background This work therefore is mainly historical in its essence The subject matter of this discourse is not only interesting but it is also informative and educational When we talk about the history of mankind we also talk about the origin and the development of their religious beliefs their culture and the social values of their life Theology a critical study of religious ideas a dogmatic approach has often in past

been a source of divisions among the people of diverse beliefs and cultures This planet would have been a much better place to live in for all human beings if man had learned to appreciate and respect the religious and cultural beliefs of the people different than those in which he had been brought up Rather than finding differences and keeping alive hatred and dislike for other faiths and beliefs he would have done better if he had understood the common purpose that exists behind all faiths Much has been said and written about the conduct of people who in the name of religion have destabilized the world peace The dangers of such religious polemics are evident in many areas of our planet In the pluralistic world of today no one faith has the monopoly of the Truth People are Christians Jews Hindus Buddhists or Muslims out of their sincere convictions Endowed with the gift of intellect and historical inheritance people have chosen different paths and ways in their search for the Truth We all eat the food grown in the same soil drink water from the same springs and breathe the air from the same atmosphere Even while holding to our own religious views there is no reason why we can not respect and appreciate the beliefs of the others An old Japanese saying goes like this There are many paths at the foot of a mountain but the view of the moon is the same at the top I would consider myself rewarded if through this work I can arouse enough interest in the minds of my readers to know and appreciate the fundamental teachings of all religions namely the understanding of God the Creator of this Universe and Man's relationship with Him

The Risks of Life Marie G. Cohen, 2009-10 *Colorado Politics and Policy* Thomas E. Cronin, Robert D. Loevy, 2012-10-15 Survey after survey reveals that many Coloradans believe that the U S government is too big too wasteful and too intrusive Yet Colorado is arguably one of the most federally subsidized states in the union with forests national parks military bases and research laboratories benefiting from the federal government's largesse A concise history of Colorado's constitution and central political institutions *Colorado Politics and Policy* offers a probing analysis of the state's political cultures It shows how the state in many ways a template of the deeply contrary politics of the nation puts political power into the hands of an ever more polarized electorate increasingly inclined to put the concerns of government to the test of the citizen initiative *Colorado Politics and Policy* is the result of broad gauged and sophisticated research which includes author interviews with citizens and officials across the state three specially commissioned statewide public opinion surveys and extensive interviews with governors legislators judges lobbyists interest group leaders and leading political analysts This fresh and engaging interpretation is essential reading for those who want to understand Colorado's major election trends chief public policy and budget challenges and this distinctively purple state's unique political history
