Making Change

Richard C. Reale

Making Change:

Systems Approaches to Making Change: A Practical Guide Martin Reynolds, Sue Holwell (Retired), 2020-02-18 The five approaches outlined in this book offers the systems thinking practitioner a range of interchangeable tools for pro actively making systemic improvements amidst complex situations of change and uncertainty Practitioners from all professional domains are increasingly confronted with incidences of systemic failure yet poorly equipped with appropriate tools and know how for understanding such failure and the making of systemic improvement In our fragile Anthropocene world where systems change is often invoked as the rallying call for purposeful alternative action this book provides a toolkit to help constructively make systems that can change situations for the better Systems Approaches offers an excellent introduction for those seeking to understand systems thinking and to enact systems thinking in practice The book helps practitioners from all professions to better understand inter relationships engage with multiple perspectives and reflect on boundary judgements that can inhibit or enhance improved purposeful change After an editorial introduction to these systems thinking in practice capabilities successive chapters illustrate five systems approaches each chosen for having a rigorous though adaptable framework and a robust long pedigree of application in complex situations Each chapter illustrates what the approach is about followed by invaluable tips and insights from experience regarding how the tools might be practiced Amongst updates from originating authors for this 2nd edition each approach has an accompanying postscript on some developments since the 1st edition

Making Change Happen on Time, on Target, on Budget Ken Matejka, Al Murphy, 2005 In this power packed toolkit Matejka and Murphy mix humor with meaning theory with skill building practicality as they put the power to successfully plan for and implement any type of change initiative into the hands of employees at every level of today s team based organizations

Making Change in Complex Organizations George K. Strodbeck, 2016-04-14 This book is written for the leader or management team of any complex organization attempting to lead an organization wide change Successfully leading change has never been easy Many realities of life in the 21st century have combined to intensify the challenge This book captures the lessons learned during more than 43 years of experience working in complex large scale organizations 14 years between West Point and the United States Army and more than 29 years in two large very different American companies These lessons learned are shared in the hope that it will help others lead change successfully and avoid at least some of the pitfalls that come with it The principles and questions in this book also benefit leaders making changes in the small organization or those who desire to transform their small organization into a large one This book is intended to serve as a leaders guide of things to think about and how to plan for successful change Many books have been written about management and leadership as well as the dos and must dos of leading an organization But few books discuss what it takes to make changes in today s complex organizations and those that do are often written by consultants who have not practiced what they propose over any significant period of time This book by contrast draws

lessons from a successful long term change made by leaders who had a personal and financial stake in the organization's success and saw the change all the way through. In my 40 years at Cummins one of the most successful changes made was our adoption of Six Sigma. When I became CEO it was clear that we needed to improve our product and overall business performance. We chose Six Sigma to help us do that. George's book concisely captures many of the things we had to think about when implementing Six Sigma throughout the company. I believe this is a good guide for any leader contemplating making an organization wide change. Tim Solso former CEO Cummins Inc. As CEO I have discovered that just saying I want something done doesn't make it happen. Change done well is hard work. George's book is a practical go to guide for driving lasting change. Tom Linebarger CEO Cummins Inc. In medicine today ever higher quality has become an expectation. This expectation is causing us increasingly to transition from volume based to value based medicine. As an industry we are quickly adapting to this new value based world. However organizations don't transform easily. It requires dedicated and engaged teams to be leaders of change in their industry. I have been waiting for a book like this for years. Whether you are a medical student or a senior attending physician George Strodbeck's book on Making Change is a must read. James Grant M.D. Chair Department of Anesthesiology Beaumont Health System Royal Oak Michigan. George Strodbeck draws on more than three decades of personal experience in planning and executing change in complex organizations. His incisive fast paced writing explains, engages and motivates. His guidance is candid about challenges faced but simultaneously practical and actionable in today's organizations. This book is for any leader seeking to accelerate the pace of change, improvement and innovation in their organizations. Mohan V. Tatikonda, PhD Professor of Operations Management, Kelley School of Business, Indiana University. **Making Change Happen** Jane Northcote, 2008. **Making Sense of Change Management** Esther Cameron, Mike Green, 2004. Written for academics and professionals alike this book is an attempt to make change easier. It is aimed at anyone who wants to understand why change happens, how it happens and what needs to be done to make change a welcome rather than a dreaded concept. Making Change Stick Richard C. Reale, 2005. Organizationally and individually to change is to choose. These twelve principles make the choices easier. **Making changes in operational PFI projects** Great Britain: National Audit Office, 2008-01-17. This NAO report forms part of a number of NAO reports looking at PFI Private Finance Initiative projects undertaken across the public sector. PFIs are contractual arrangements with private sector companies to design, build, finance and operate institutions such as schools and hospitals. At present there are over 500 operational projects throughout the UK with a combined capital of 44 billion. It is also estimated that including future payments with many projects running up until 2031-32 capital will rise to 91 billion. Given the length of many of the contracts it is inevitable that operational changes to services will be required so it is important that PFI contracts have flexibility with built in value for money. The report is divided into three parts with appendices. The NAO has set out a number of findings including that PFI deals are offering sufficient flexibility to the public sector that some projects achieve better value than

others but that i higher value changes were not always competitively tendered ii for minor works there was little consistency in the methods used by the public sector iii that the cost of replacing items throughout the life of the contract was also inconsistently applied iv that contractors had often charged additional fees which were not specified in the original contract The NAO recommendations include where there is a relevant contract clause competitive tendering should be undertaken for existing contract deals authorities employing contractors need to put in place consistent and robust means to validate the costs of small changes public authorities should explore with their private sector partners the feasibility of clarifying current contracts so they follow current best practice contract management should be properly resourced in order to manage the change process Public sector authorities could improve value for money of operational changes by adopting a strategic approach to changes keeping a good permanent record of changes and payments made fostering open lines of communication with front line users and other stakeholders as well as the PFI contractor
