Library. Latin American Collection, 1969 The Invention of the Brazilian Northeast Durval Muniz de Albuquerque Jr., 2014-10-17 Brazil's Northeast has traditionally been considered one of the country's poorest and most underdeveloped areas In this

impassioned work the Brazilian historian Durval Muniz de Albuquerque Jr investigates why Northeasterners are marginalized and stereotyped not only by inhabitants of other parts of Brazil but also by nordestinos themselves His broader question though is how the Northeast came into existence Tracing the history of its invention he finds that the idea of the Northeast was formed in the early twentieth century when elites around Brazil became preoccupied with building a nation Diverse phenomena from drought policies to messianic movements banditry to new regional political blocs helped to consolidate this novel concept the Northeast Politicians intellectuals writers and artists often nordestinos played key roles in making the region cohere as a space of common references and concerns Ultimately Albuquerque urges historians to question received concepts such as regions and regionalism to reveal their artifice and abandon static categories in favor of new more granular understandings
