With the proliferation of information on the World Wide Web and in other networked environments one of the main things that users search for are images of works of art and architecture End users generally try to search for images by subject a process that often proves unsatisfactory and frustrating Cataloging images of works of art has always been challenging but now that end users need only have access to the Internet the challenge is more daunting than ever This illustrated book on using metadata standards and controlled vocabularies to catalog and provide accurate end user access to images of works of art also focuses on decisions that must be made about the arrangement of visual records descriptive principles and methodologies and requirements for access Introduction to Art Image Access addresses the issues that underlie a visual collection to make it accessible in an electronic environment A glossary selected bibliography and list of acronyms and URLs are included      Video Object Extraction and Representation I-Jong Lin, S.Y. Patent and Trademark Office, 2001      **Vermeer's Wager** Ivan Gaskell, 2000-10 Vermeer's Wager stands at the intersection of art history and criticism philosophy and museology Using

a familiar and celebrated painting by Johannes Vermeer as a case study Ivan Gaskell explores what it might mean to know and use a work of art He argues that art history as generally practiced while successfully asserting certain claims to knowledge fails to take into account aspects of the unique character of works of art Our relationship to art is mediated not only through reproduction particularly photography but also through displays in museums In an analysis that ranges from seventeenth century Holland through mid nineteenth century France to artists and curators practice today Gaskell draws on his experience of Dutch art history philosophy and contemporary art criticism Anyone with an interest in Vermeer and the afterlife of his art will value this book as will all who think seriously about the role of photography in perception and the core purposes of art museums
