Reasoning and Unification over Conceptual Graphs Dan Corbett, 2012-12-06 Reasoning and Unification over Conceptual Graphs is an exploration of automated reasoning and resolution in the expanding field of Conceptual Structures Designed not only for computing scientists researching Conceptual Graphs but also for anyone interested in exploring the design of knowledge bases the book explores what are proving to be the fundamental methods for representing semantic relations in knowledge bases While it provides the first comprehensive treatment of Conceptual Graph unification and reasoning the book also addresses fundamental issues of graph matching automated reasoning knowledge bases constraints ontology and design With a large number of examples illustrations and both formal and informal definitions and discussions this book is excellent as a tutorial for the reader new to Conceptual Graphs or as a reference book for a senior researcher in Artificial Intelligence Knowledge Representation or Automated Reasoning

Conceptual Structures at Work Karl Erich Wolff, Heather D. Pfeiffer, Harry S. Delugach, 2004-06-29 This volume contains selected papers presented at the 12th International Conference on Conceptual Structures ICCS 2004 held in Huntsville Alabama July 19-23 2004 The main theme of the conference Conceptual Structures at Work was chosen to express our intention of applying conceptual structures for human centered practical purposes That invites us to develop not only clear conceptual theories but also methods to support human in the application of these theories in their societies Some promising steps in this direction are being taken but the gap between the researchers working on a highly sophisticated level on one side and the practitioners in many fields of applications on the other side is usually difficult to bridge Some of us have experiences in such practical cooperation but we need more members of our community to be engaged in real life problems We all know that solutions of complex problems in practice require not only a well developed formal theory but also an understanding of the whole context of the given problems To support our understanding we need general philosophical methods as well as formal theories for the representation of fundamental structures in practice We believe that our community has powerful tools and methods for successful applications in practice but that we must develop a forum to present our results to a broader audience First we must understand the significant developments in our own group which has activities in many directions of research
