the analytic issues faced by users of the data now distributed by MARPOR It also provides concrete strategies for tackling these at the research level with examples from the field of political representation The problems of uncertainty error reliability and validity considered here are generic issues for political analysts in any area of research so the book has an interest extending beyond the Manifesto estimates themselves in particular to other textual analyses In addition the book widens the range of applications introduced in our two previous volumes and discusses the extension of the manifesto project database to cover Latin America
