Polyolefin Production Processes Marshall Sittig,1976 (géophysicien),1976 **Polyolefin Production Processes** Marshall Sittig (géophysicien),1976 Polymer Manufacturing Industry, Background Information for Proposed Standards ,1987 *Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Synthetic Resins Segment of the Plastics and Synthetic Materials Manufacturing Point Source Category* United States. Environmental Protection Agency. Effluent Guidelines Division,1974 *Advanced Separation Techniques for Polyolefins* Harald Pasch,Muhammad Imran Malik,2014-08-27 This Springer Laboratory volume introduces the reader to advanced techniques for the separation and fractionation of polyolefins It includes detailed information on experimental protocols and procedures addressing the experimental background of different polyolefin fractionation techniques in great detail The book summarizes important applications in all major fractionation methods with emphasis on multidimensional analytical approaches It comprises the most powerful modern techniques such as high temperature size exclusion chromatography HT SEC for molar mass analysis temperature rising elution fractionation TREF and crystallization analysis fractionation CRYSTAF for the analysis of chemical composition and branching high temperature two dimensional liquid chromatography HT 2D LC solvent and temperature gradient interaction chromatography SGIC and TGIC and crystallization elution fractionation CEF Beginners as well as experienced chromatographers will benefit from this concise introduction to a great variety in instrumentation separation procedures and applications With detailed descriptions of experimental approaches for the analysis of complex polyolefins the readers are offered a toolbox to solve simple as well as sophisticated separation tasks The book starts with an introduction into the molecular complexity of polyolefins the most widely used synthetic polymers with rapidly growing production capacities It systematically discusses crystallization based fractionation techniques including TREF CRYSTAF and CEF and column chromatographic techniques for molar mass chemical composition and microstructure as well as the combination of different fractionations in multidimensional experimental setups This book also includes basic information on the application of high temperature field flow fractionation Integrated Process Modeling, Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing Y. A. Liu,Niket Sharma,2023-07-25 *Integrated Process Modeling Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing* Detailed resource on the Why What and How of integrated process modeling advanced control and data analytics explained via hands on examples and workshops for optimizing polyolefin manufacturing *Integrated Process Modeling Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing* discusses as well as demonstrates the optimization of polyolefin production by covering topics from polymer process modeling and advanced process control to data analytics and machine learning and sustainable design and industrial practice The text also covers practical problems handling of real data streams developing the right level of detail and tuning models to the available data among other topics to allow for easy translation of concepts into practice

Written by two highly qualified authors Integrated Process Modeling Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing includes information on Segment based modeling of polymer processes selection of thermodynamic methods estimation of physical properties for polymer process modeling Reactor modeling convergence tips and data fit tool free radical polymerization LDPE EVA and PS Ziegler Natta polymerization HDPE PP LLPDE and EPDM and ionic polymerization SBS rubber Improved polymer process operability and control through steady state and dynamic simulation models Model predictive control of polyolefin processes and applications of multivariate statistics and machine learning to optimizing polyolefin manufacturing Integrated Process Modeling Advanced Control and Data Analytics for Optimizing Polyolefin Manufacturing enables readers to make full use of advanced computer models and latest data analytics and machine learning tools for optimizing polyolefin manufacturing making it an essential resource for undergraduate and graduate students researchers and new and experienced engineers involved in the polyolefin industry

Organic Polymer Chemistry K.J. Saunders, 2012-12-06 This book deals with the organic chemistry of polymers which find technological use as adhesives fibres paints plastics and rubbers For the most part only polymers which are of commercial significance are considered and the primary aim of the book is to relate theoretical aspects to industrial practice The book is mainly intended for use by students in technical institutions and universities who are specializing in polymer science and by graduates who require an introduction to this field There are available several books dealing with the physical chemistry of polymers but the organic chemistry of polymers has not received so much attention In recognition of this situation and because the two aspects of polymer chemistry are often taught separately this book deals specifically with organic chemistry and topics of physical chemistry have been omitted Also in this way the book has been kept to a reasonable size This is not to say that integration of the two areas of polymer science is undesirable on the contrary it is important that the inter relationship should be appreciated I was gratified by the favourable comments prompted by the first edition of the book and I have therefore retained the same organization in this second edition Nevertheless the book has been extensively revised to reflect the developments which have taken place
