Performance Evaluation for Public Enterprises Leroy P. Jones, 1991

Performance evaluation is not a simple task in private enterprises and it is all the more complicated in public enterprises This paper emphasizes three main points a a public enterprise must be evaluated b a public enterprise must not be evaluated like a private enterprise and c a public enterprise should be evaluated by starting with private profit and making a series of adjustments to make it fair to the nation and to managers This paper suggests introducing a signaling system which consists of three major components The first is a performance evaluation system in which national goals are translated into explicit enterprise objectives and quantified in a performance criterion The second is a performance information system in which actual achievements are monitored The third is an incentive system in which the welfare of

managers and workers is linked to national welfare by a pecuniary or non pecuniary bonus system based on achievement of particular target values of the criterion variables The paper proposes a phased system of implementation stressing how performance evaluation must be the product of an evolutionary process involving both enterprise managers and government supervisors

Corporate Governance of Public Enterprises in Transitional Economies Dominique Pannier, 1996-01-01 World Bank Technical Paper No 323 Draws on the contrasting experiences of five large transitional economies Hungary Poland Romania Russia and Ukraine in the management and oversight of public enterprises Relevant experiences of developed market economies are included

Evaluating the Performance of Public Enterprises in Pakistan Mary M. Shirley, 1989 Even managers critical of Pakistan's new performance evaluation system consider its targeting and bonus system a powerful incentive to improve efficiency

Public Industrial Enterprises Mahmood Ali Ayub, Sven Olaf Hegstad, 1986 The main purpose of this study is to identify the factors separate and apart from ownership which influence the performance of public industrial enterprises Based on a review of performance of state owned enterprises in 13 countries the authors isolate three main factors relating to the business and managerial environment that distinguish successful public enterprises from the poorly performing ones These include i the degree of competition that public enterprises are exposed to ii the degree of financial autonomy and accountability under which public enterprises operate and iii the extent and manner in which managerial autonomy and accountability are ensured It is impossible and perhaps misleading to assess statistically the individual importance of each of these factors What is clear from the analysis is that where these three factors exist as a package the performance of public enterprises is significantly better than in those cases where most or all of these factors are non-existent

Role and Performance of Public Enterprises Stephanie Warm, Christina Schaefer, Benjamin Friedländer, 2018 The public sector has continually faced reforms modernizations and institutional changes For the special case of Germany empirical studies illustrate a high relevance of public enterprises PEs for fulfilling public purposes and providing public services An increasing pressure for effectiveness and efficiency of PEs implicates new requirements for analytical procedures to review public tasks in general but also for making best institutional choices Based on the concepts of a critical review of tasks and an in depth performance analysis as well as legal obligations three major PEs at the federal level are systematically analysed according to their strategic relevance and specificity However the study provides a mixed picture Requirements for the explanation of the public interest of the analysed PEs are not sufficiently met The paper provides a conceptual framework to assess the role and performance of PEs as well as promising results and further implications both for researchers and practitioners

Lee,Fred Nixon,2012-08-06 First published in 1984 this textbook analyses at both aggregate and micro economic levels the contemporary industrial conditions in Third World countries and relates this to the process of economic growth and structural transformation Drawing upon both industrial and development economics the authors offer a comprehensive and integrated treatment of the different levels of industrial analysis in less developed countries alongside a wealth of comparative data on industrial structure business concentration and behaviour and industrial policies in a cross section of countries in Africa Asia the Far East and Latin America **Economic Performance of Public Enterprises** , **Kiribati Social and Economic Report 2008** Asian Development Bank,2009-12-01 After two impressively peaceful decades there are signs of a dangerous degree of complacency in Kiribati s view of its domestic and external affairs Forms of cultural and political resistance to change have thus been encouraged and these are handicapping the nation s response to development risks Eight leading sources of development risk confronting Kiribati are identified and these require understanding and appropriate responses in the form of well formulated national development strategies Based on a thorough assessment of risks priorities and options by sector in the main report 16 policy actions are recommended as keys to the full range of responses that need to be formulated to cope with development risk
