Performing World Of The Actor:

Performance and Identity in the Classical World Anne Duncan,2006-01-30 Performance and Identity in the Classical World traces attitudes towards actors in Greek and Roman culture as a means of understanding ancient conceptions of and anxieties about the self Actors were often viewed as frauds and impostors capable of deliberately fabricating their identities Conversely they were sometimes viewed as possessed by the characters that they played or as merely playing themselves onstage Numerous sources reveal an uneasy fascination with actors and acting from the writings of elite intellectuals philosophers orators biographers historians to the abundant theatrical anecdotes that can be read as a body of popular performance theory This text examines these sources along with dramatic texts and addresses the issue of impersonation from the late fifth century BCE to the early Roman Empire

Immersive Theater and Activism Nandita Dinesh,2018-11-30 Immersive theater calls upon audience members to become participants actors and others It traditionally offers binary roles that of oppressor or that of victim and thereby stands the risk of simplifying complex social situations Challenging such binaries this book articulates theatrical grey zones when addressing juvenile detention wartime interventions and immigration processes It presents scripts and strategies for directors and playwrights who want to create theatrical environments that are immersive and pedagogical aesthetically evocative and politically provocative simple and complex

Douglas Crawford, 2016-12-07 One remarkable ability of the human brain is to process large amounts of information about our surroundings to allow us to interact effectively with them In everyday life the most common way to interact with objects is by reaching grasping lifting and manipulating them Although these may sound like simple tasks the perceptual properties of the target object such as its location size shape and orientation all need to be processed in order to set the movement parameters that allow an accurate reach to grasp to lift movement Several brain areas work in concert to process this outstanding amount of visual information and drive the execution of a motor plan in just a few hundred milliseconds How are these processes orchestrated In developing this type of comprehensive knowledge about the interactions between objects perception and goal directed actions we have a window into the mechanisms underlying the functioning of the visuo motor system With this research topic we aim to further understand the neural mechanisms that mediate our interactions with the world Therefore we particularly encourage submission of papers that attempt to relate such findings to real world situations by investigating behavioural and neural correlates of information processing related to eye hand coordination and visually guided actions including reaching grasping and lifting movements This topic welcomes submissions of original research using any relevant techniques and methods from behavioural kinematics kinetics to neuroimaging and transcranial magnetic stimulation TMS as well as neuropsychological studies *On the Move to Meaningful Internet Systems 2004: OTM 2004 Workshops* Zahir Tari, Angelo Corsaro, 2004-10-14 A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself In fact their attendance was largely sponsored by the other participants If evaluated as successful it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting applications pulled created by the Internet and the so called Semantic Web For DOA 2004 the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004 it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004 the main topic was the interaction of such technologies and methods with management issues such as occurs in networked organizations These subject areas naturally overlap and many submissions in fact also treat envisaged mutual impacts among them *The Professional Actor, from Audition to Performance* Tom Markus, 1979 B T 8 95 8 50 210108 How to Take Action for Successful Performance Management Falconer

Mitchell, Hanne Nørreklit, 2019-08-27 This book is intended for practitioners students and researchers who are interested in designing using assessing and researching performance management systems Managerial personnel involved in such activity will hold many beliefs about how their organization functions This text uses the philosophy of pragmatic constructivism to show how managerial beliefs that underlie action can be made explicit and so facilitate their assessment and improvement This involves recognizing and integrating the four dimensions facts possibilities values and communication that represent how managers relate to the reality in which they operate When managerial beliefs are based on an accurate representation of reality they are more likely to be successful Problems occur where reality is misrepresented in managerial beliefs This is especially so in performance management as the book illustrates using real world examples Specific topics addressed include planning and decision making performance management of investment center managers strategic performance management and operational performance management **Our actors and actresses.
