Primitive Jo Odgers,Flora Samuel,Adam Sharr,2006-09-27 This innovative edited collection charts the rise fall and possible futures of the word primitive The word primitive is fundamental to the discipline of architecture in the west providing a convenient starting point for the many myths of architecture s origins Since the almost legendary 1970s conference on the Primitive with the advent of post modernism and in particular post colonialism the word has fallen from favour in many disciplines Despite this architects continue to use the word to mythologize and reify the practice of simplicity Primitive includes contributions from some of today s leading architectural commentators including Dalibor Vesely Adrian Forty David Leatherbarrow Richard Weston and Richard Coyne Structured around five sections Negotiating Origins Urban Myths Questioning Colonial Constructs Making Marks and Primitive Futures the essays highlight the problematic nature of ideas of the primitive engage with contemporary debate in the field of post colonialism and respond to a burgeoning interest in the non expert architecture This now controversial subject remains for better or worse intrinsic to the very structure of Modernism and deeply embedded in architectural theory Considering a broad range of approaches this book provides a rounded past present and future of the word primitive in the architectural sphere Primitive Architecture Barr Ferree,2013-12-07 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book The below data was compiled from various identification fields in the bibliographic record of this title This data is provided as an additional tool in helping to ensure edition identification Primitive Architecture Barr Ferree Architecture General Architecture General

Architecture Primitive **Prehistoric Man** Sir Daniel Wilson,1862 *The Idea of the Cottage in English Architecture, 1760 - 1860* Daniel Maudlin,2015-07-24 The Idea of the Cottage in English Architecture is a history of the late Georgian phenomenon of the architect designed cottage and the architectural discourse that articulated it It is a study of small buildings built on country estates and not so small buildings built in picturesque rural settings resort towns and suburban developments At the heart of the English idea of the cottage is the Classical notion of retreat from the city to the countryside This idea was adopted and adapted by the Augustan infused culture of eighteenth century England where it gained popularity with writers artists architects and their wealthy patrons who from the later eighteenth century commissioned retreats gate lodges estate workers housing and seaside villas designed to appear as cottages The enthusiasm for cottages within polite society did not last By the mid nineteenth century cottage related building and book publishing had slowed and the idea of the cottage itself was eventually lost beneath the Tudor barge boards and decorative chimneystacks of the Historic Revival And yet while both designer and consumer have changed over time the idea of the cottage as the ideal rural retreat continues to resonate through English architecture and English culture *Primitive Architecture* Anthony G. White,1985 *A History of Architecture on the Comparative Method for Students, Craftsmen, & Amateurs* Sir Banister Fletcher,1924 *Frank Lloyd Wright and Le Corbusier* Richard A. Etlin,1994 Architectural historian Etlin defines the main principles of progressive 19th century architectural thought the picturesque philosophical eclecticism and the spirit of the times These principles are explored in detail in relation to 19th and 20th century architecture and also to demonstrate their importance to the work of Wright and Le Corbusier Illustrated with drawings and photos Distributed by St Martin s Press Annotation copyrighted by Book News Inc Portland OR **Factors that Determine the Nature of Primitive Architecture; with Reference to South American Primitive Architecture** Barbara Ellen Cohen,1977 **Modern Architecture and Climate** Daniel A. Barber,2020-07-07 How climate influenced the design strategies of modernist architects *Modern Architecture and Climate* explores how leading architects of the twentieth century incorporated climate mediating strategies into their designs and shows how regional approaches to climate adaptability were essential to the development of modern architecture Focusing on the period surrounding World War II before fossil fuel powered air conditioning became widely available Daniel Barber brings to light a vibrant and dynamic architectural discussion involving design materials and shading systems as means of interior climate control He looks at projects by well known architects such as Richard Neutra Le Corbusier L cio Costa Mies van der Rohe and Skidmore Owings and Merrill and the work of climate focused architects such as MMM Roberto Olgyay and Olgyay and Cliff May Drawing on the editorial projects of James Marston Fitch Elizabeth Gordon and others he demonstrates how images and diagrams produced by architects helped conceptualize climate knowledge alongside the work of meteorologists physicists engineers and social scientists Barber describes how this novel type of environmental media catalyzed new ways of thinking about climate and architectural design

Extensively illustrated with archival material *Modern Architecture and Climate* provides global perspectives on modern architecture and its evolving relationship with a changing climate showcasing designs from Latin America Europe the United States the Middle East and Africa This timely and important book reconciles the cultural dynamism of architecture with the material realities of ever increasing carbon emissions from the mechanical cooling systems of buildings and offers a historical foundation for today s zero carbon design
