Primary Thinking Skills A 1:

Primary Education Thinking Skills (P.E.T.S.T.M) Book 1 - Updated Edition, 2012 PETSTM Primary Education Thinking Skills is a systematized enrichment and diagnostic thinking skills program. Lessons are presented in convergent analysis, divergent synthesis, visual spatial thinking, and evaluation, suitable for grades K-3. The program aligns to the higher levels of Bloom's Taxonomy. PETSTM 1 the red book introduces the six thinking specialists of Crystal Pond Woods: Dudley the Detective, the convergent deductive thinker; Isabel the Inventor, the divergent inventive thinker; Sybil the Scientist, the convergent analytical thinker; Yolanda the Yarnspinner, the divergent creative thinker; Max the Magician, the visual spatial thinker; Jordan the Judge, the evaluative thinker. Included in the 24 lessons are encounters with the animal characters who are engaged in problem solving scenarios calling for their types of thinking: four lessons involving each character, two whole class lessons to help identify talented learners with accompanying reproducible activities, and two small group lessons for identified students and accompanying reproducible activities. PETSTM helps build behavioral portfolios for talented learners that support a differentiated approach to their education, integrates flexibly into any existing primary curriculum, and offers opportunities for learners with different strengths to shine. How hard is it for you to come up with ideas to boost learning for children at home? Don't be taken in by expensive educational materials and toys that might not be up to date, age appropriate, or geared toward your child's learning style. A child's most important first teacher is the parent. With our preschool, primary, and upper grades programs, we involve the parents in the individual educational needs of their child or children. Please take some time to review the materials and learn more about simple educational materials and tools that you can use with your children at home to boost their IQ and vocabulary. This program only requires a few minutes each day, too, as often as you would like. **Children's Learning in Primary Schools** Mike Cowdray, 2012-09-11 What does learning look like? What are different subjects really about? Why are transferable skills so important? How can we overcome the difficulties that children encounter in their learning? And what questions and prompts are likely to prove useful in helping children to get the most out of their lessons? The overarching role of Teaching Assistants is to support teaching and learning in schools. To do this effectively, they need to understand the curriculum content of all the subjects in which they provide support and know what learning outcomes are sought. This accessible book provides an overview of the knowledge, skills, understanding, and
