Primer of Logic Henry Bradford Smith, 2015-06-25 Excerpt from Primer of Logic In the pages which follow will be found the outlines of the logic of a set of categorical forms which are not Aristotle's own It is only the fragment of a general theory but the content of all the chapters of the old logic which are commonly regarded as essential except that one which deals with the calculus of classes will be found included In the first appendix the relation of these new forms to the traditional ones has been pointed out in detail I have at least one debt which calls for a definite acknowledgement It is to my friend and teacher Mr Edgar A Singer Jr that I owe what training I have had in the science He has never failed through hints thrown out in conversation to correct my misapprehensions But my indebtedness is more specific than this I have so far employed his own method a method developed in his academic lectures that I could scarcely have ventured upon the publication of these outlines of a theory without his express permission About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
