the political and cultural significance of the forest that shaped the forest's current state and picture. Our book will deliver a picture of a crucial moment in forest history relevant not only to Central Europe but to the continent in general. Moment of transition between a royal hunting ground, traditional type of use widespread throughout Europe, to a modern managed forest. Looking at main obstacles in the management shift, the essential difference in perceptions of the forest and goods it provides in both modes of management and the implications of the management change for the state of BPF in the long 19th century could help in better understanding the changes that European forests underwent in general. **Geographical**
