*Man and Metaphysics* George Plimpton Adams, 1948      **Reality and Man** Semen Liudvigovich Frank, 1965      **Man and the Cosmos** Joseph Alexander Leighton, 1922      **Man and the Cosmos** Joseph Alexander Leighton, 2015-06-05

Excerpt from *Man and the Cosmos* An Introduction to Metaphysics The following work is a systematic consideration of the fundamental problems and concepts of philosophical thought in the light of recent discussion in science and philosophy The leading motive of the entire work is the problem of Human Personality I have therefore given the largest amount of space to the treatment of the Self But since one cannot consider the place of personality in the universe without being drawn into the fundamental problem of metaphysics namely that of the structure of the universe as a whole I have tried to give just consideration to the latter problem Moreover since philosophy is the thinking consideration of fundamental questions one must settle accounts with the problems of thought and knowledge I have therefore begun with a comprehensive treatment of these problems My theory of knowledge is realistic but it differs materially from the standpoints of most of the new realists I hold that the true antithesis in theories of knowledge is not between realism and idealism but between realism and mentalism or subjectivism The great idealistic tradition in metaphysics from Plato to Hegel Bradley and Bosanquet is not subjectivistic in theory of knowledge In the main I sympathize most with this tradition although I have found it necessary to criticize the concepts of the Absolute and the equivocal treatment of Time Progress and Personality in recent representatives of metaphysical idealism To me the dominating note of the great idealistic tradition is the ever renewed attempt to determine in the light of reason and of the history of culture the humanistic values of experience and the place of these in the universe My conception of the meaning of the universe is dynamic Therefore the metaphysical standpoint of the following work might be called Dynamic Idealism in the sense that it aims to find in the living universe a home and scope for humanistic ideals or values My chief quarrel with pragmatic humanism is that its humanism is too narrow and that it tends to slight the place of order or reason in man and the universe About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **The Greatness of God** Charles Frank Thompson, 2016-02-08 With each passing day our world seems to drift further and further away from the God of the Bible divine creation and Christian belief This societal shift toward postmodernism and secularism is not a new development however the expanding and intensifying revolt against the biblical God and Christianity traces its roots back to the modern philosophies of the Enlightenment and Romanticism which have given rise to many divergent views during the

past three centuries and become even more extreme in recent postmodernism The Greatness of God How God Is the Foundation of All Reality Truth Love Goodness Beauty and Purpose stands as an intellectual counterweight to the prevailing winds of a secular postmodern world Author Charles Frank Thompson argues that the consequences of this rejection of God and divine creation have not been benign He traces the modern revolution in detail and describes its deleterious consequences including the loss of the ultimate basis for universal truth knowledge meaning and purpose In The Greatness of God Thompson explores a wide range of topics including Christian theology metaphysical philosophy and an analysis of modern thought and art He examines the rich history of Christian poetry prose and art and takes a look at recent scientific discoveries that help us understand Christian teachings about God s creation He concludes with an exploration of the millennium the eternal kingdom of God and the spiritual state of America and Europe today *Man and the Cosmos - An Introduction to Metaphysics* Joseph Alexander Leighton,2015-10-28 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Man's Self-Interpretation-in-Existence** Anna-Teresa Tymieniecka,2012-12-06

*Review Quarterly*, 1909      *Modern and Postmodern Crises of Symbolic Structures* Peter Šajda, 2020-10-20 In debates about philosophical anthropology human beings have been defined in different ways In *Modern and Postmodern Crises of Symbolic Structures* the contributors view the human being primarily as animal symbolicum They examine how the human being creates interprets and changes symbolic structures as well as how he is affected and impacted by them The focus lies on the context of modernity and postmodernity which is characterized by a number of interrelated crises of symbolic structures These crises have affected the realms of science religion art politics and education and thus provoked crucial changes in the human being's relations to himself others and reality The crises are not viewed merely as manifestations of dysfunctions but rather as complex processes of transformation that also provide new opportunities      *Prussia's Representative Man* Francis Lloyd (of the Universities of Halle and Athens.), William Newton (F.R.G.S.), 1875      **Narratives of Nothing in 20th-Century Literature** Meghan Vicks, 2017-04-20 The concept of nothing was an enduring concern of the 20th century As Martin Heidegger and Jean Paul Sartre each positioned nothing as inseparable from the human condition and essential to the creation or operation of human existence as Jacques Derrida demonstrated how all structures are built upon a nothing within the structure and as mathematicians argued that zero the number that is also not a number allows for the creation of our modern mathematical system *Narratives of Nothing in 20th Century Literature* suggests that nothing itself enables the act of narration Focusing on the literary works of Vladimir Nabokov Samuel Beckett and Victor Pelevin Meghan Vicks traces how and why these writers give narrative form to nothing demonstrating that nothing is essential to the creation of narrative that is how our perceptions are conditioned how we make meaning or madness out of the stuff of our existence how we craft our knowable selves and how we exist in language      **Man's Place in the Cosmos, and Other Essays ...
