Pasmore, Bengt Stymne, Niclas Adler, 2007-08-23 This handbook provides the latest thinking methodologies and cases in the rapidly growing area of collaborative management research What makes collaborative management research different is its emphasis on creating a close partnership between scholars and practitioners in the search for knowledge concerning organizations and complex systems In the ideal situation scholars and their managerial partners would work together to define the research focus develop the methods to be used for data collection participate equally in the analysis of data and work together in the application and dissemination of knowledge The handbook contains insightful reflections on the state of the art as well as detailed descriptions of the collaborative efforts of an international group of leading edge academics and their practitioner counterparts The applications of collaborative research methods included in this volume include those aimed at individual development organizational development regional development efforts and economic policy The insights from the cases suggest that collaborative management research has been a highly effective means of getting at issues that other research methods and intervention techniques have failed to address The rationale for conducting this highly engaging type of research is explored in the first section of the handbook followed by sections that offer new methodologies descriptive cases views from those directly involved and issues and enablers about the use of this approach in advancing knowledge and practice The handbook does appeal to scholarly practitioners as well as practical scholars

**The SAGE Handbook of Research Management** Robert Dingwall, Mary Byrne McDonnell, 2015-08-17 The Handbook of Research Management is a unique tool for the newly promoted research leader Larger scale projects are becoming more common throughout the social sciences and humanities housed in centres institutes and programmes Talented researchers find themselves faced with new challenges to act as managers and leaders rather than as individual scholars They are responsible for the careers and professional development of others and for managing interactions with university administrations and external stakeholders Although many scientific and technological disciplines have long been organized in this way few resources have been created to help new leaders understand their roles and responsibilities and to reflect on their practice This Handbook has been created by the combined experience of a leading social scientist and a chief executive of a major international research development institution and funder The editors have recruited a truly global team of contributors to write about the challenges they have encountered in the course of their careers and to provoke readers to think about how they might respond within their own contexts This book will be a standard work of reference for new research leaders in any discipline or country looking for help and inspiration The editorial commentaries extend its potential use in support of training events or workshops where groups of new leaders can come together and explore the issues that are confronting them
