Management Of Technologic Pb0 Pb:

Microbial Technology for Sustainable E-waste Management Prasenjit Debbarma, Saurabh Kumar, Deep Chandra Suyal, Ravindra Soni, 2023-03-01 This book besides discussing challenges and opportunities will reveal the microbe metal interactions and strategies for e waste remediation in different ecosystems It will unveil the recent biotechnological advancement and microbiological approach to sustainable biorecycling of e waste such as bioleaching for heavy metal extraction valorization of precious metal biodegradation of e plastic the role of the diverse microbial community in e waste remediation genetically engineered microbes for e waste management the importance of microbial exopolysaccharides in metal biosorption next generation technologies omics based technologies etc It also holds the promise to discuss the conservation utilization and cataloging indigenous microbes in e waste polluted niches and promising hybrid technology for sustainable e waste management Revolution in the area of information technology and communication is constantly evolving due to scientific research and development Concurrently the production of new electrical and electronic equipment also thus uplifting in this era of revolution These technological advancements certainly have problematic consequences which is the rise of huge amounts of electronic obsolesces or electronic waste e waste Improper management of both hazardous and nonhazardous substances of e waste led to a major concern in our digital society and environment Therefore a sustainable approach including microbial candidates to tackle e waste is the need of the hour Nevertheless the continuous demand for new generation gadgets and electronics set this high tech evolution to a new frontier in the last few years With this continuing trend of technological development e waste is expanding exponentially worldwide In the year of 2019 the worldwide generation of e waste was approximately 53.6 Mt of which only about 17.4% of e waste was collected and recycled and the other 82.6% was not even documented E waste contains various heterogeneous waste complexes such as metals 60% blends of many polymers 30% and halogenated compounds radioactive elements and other pollutants 10% respectively The sustainable efficient and economic management of e waste is thus a challenging task today and in the coming decades Conventional techniques such as the use of chemicals incineration and informal ways of e waste dismantling trigger serious health risks and contamination to the human population and environment respectively due to the liberation of toxic and hazardous substances from the waste In this context bio candidates especially microorganisms could be sharp edged biological recycling tools to manage e waste sustainably As microbes are omnipresent and diverse in their physiology and functional aspects they offer a wide range of bioremediation

Water Management Iqbal M. Mujtaba, Thokozani Majazi, Mutiu Kolade Amosa, 2018-11-05 Exponential growth in population and improved standards of living demand increasing amount of freshwater and are putting serious strain on the quantity of naturally available freshwater worldwide Water Management Social and Technological Perspectives discusses developments in energy efficient water production management wastewater treatment and social and political aspects related to water management and re use of treated water

It features a scientific and technological perspective to meeting current and future needs discussing such technologies as membrane separation using reverse osmosis the use of nanoparticles for adsorption of impurities from wastewater and the use of thermal methods for desalination The book also discusses increasing the efficiency of water usage in industrial agricultural and domestic applications to ensure a sustainable system of water production usage and recycling With 30 chapters authored by internationally renowned experts this work offers readers a comprehensive view of both social and technological outlooks to help solve this global issue *Adsorption Technology in Water Treatment* Eckhard

Worch,2012-08-31 Adsorption processes have played a central role in water treatment for many years but their importance is on the rise with the continuous discoveries of new micropollutants in the water cycle pharmaceuticals for example In addition to the classical application in drinking water treatment other application fields are attracting increasing interest such as wastewater treatment groundwater remediation treatment of landfill leachate and so on Based on the author s long term experience in adsorption research the scientific monograph treats the theoretical fundamentals of adsorption technology for water treatment from a practical perspective It presents all the basics needed for experimental adsorption studies as well as for process modelling and adsorber design Topics discussed in the monograph include introduction into basic concepts and practical applications of adsorption processes adsorbents and their characterisation single and multi solute adsorption equilibria adsorption kinetics adsorption dynamics in fixed bed adsorbers and fixed bed adsorber design regeneration and reactivation of adsorbents introduction into geosorption processes in bank filtration and groundwater recharge According to the increasing importance of micropollutants in the water cycle particular attention is paid to their competitive adsorption in presence of background organic matter Clear illustrations extensive literature references and a useful index make this work indispensable for both scientists and technicians involved in water treatment *Spon's Architects' and Builders' Price* Davis

Langdon,2004-08-26 Spon s Architects and Builders Price Book 2005 is the most detailed professionally relevant source of construction price information currently available anywhere With its unique Tender Index it is the only price book that publishes details of its cost base in a way allowing adjustments for market conditions that affect building prices A separate minor works section covers contracts of around 65 000 in value The 2005 edition includes the following new items acrylic water based emulsion paints additional insulation boards and quilts green items and head and wall restraints among others
