Managing Change In Political Parties British Party Conferences In Comparative Perspective:

Party Reform Anika Gauja, 2016-11-24 *Party Reform* is a new comparative study of the politics of party organization. The book provides a novel perspective in party scholarship and develops the concept of reform as distinct from evolutionary and incremental processes of party change. As an outcome, reform is captured in deliberate and often very public changes to parties' organizational rules and processes. As a process, it offers a party the opportunity to re-brand and publicly alter its image to emphasize certain strategic priorities over others and to alter relationships of power within the party. Analyzing the last ten years of party reform across a handful of established democracies including Australia, the United Kingdom, Canada, and Germany, the book examines what motivates political parties to undertake organizational reforms and how they go about this process. *Party Reform* reveals how parties' perceptions of the social trends in which they operate shape reform agendas and how this relates to competitive demands and pressures from within the party for organizational change. In addition to the motivations for reform, the book is equally concerned with the process of reform. The book demonstrates that declining party memberships have had a fundamental effect on the way in which political parties sell organizational reform as part of a broader rhetoric of democratization, of re-engagement, and of modernization delivered to diverse audiences both internal and external to the party. The chapters focus particularly on four key reform initiatives that begin to blur the traditional boundaries of party: the introduction of primaries, the changing meaning of party membership, issues-based online policy development, and community organizing campaigns. Using these cutting-edge developments as primary examples, this book provides a framework for understanding why and how reforms occur and what the consequences might be in terms of how we think about modern political parties as vehicles for participation and representation. *Comparative Politics* is a series for researchers, teachers, and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterised by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information, visit www.ecpr.net. The series is edited by Emilie van Haute, Professor of Political Science, Université libre de Bruxelles; Ferdinand Müller-Rommel, Director of the Center for the Study of Democracy, Leuphana University; and Susan Scarrow, Chair of the Department of Political Science, University of Houston.

Party Leaders and their Selection Rules in Western Europe Bruno Marino, 2021-09-23 This book analyses the determinants behind the openings in party leader selection rules, leaders' selectorate in 10 Western European countries and more than 55 parties between the mid 1980s and the mid 2010s. Presenting a novel and revealing theoretical and empirical framework, it tackles the impact of party change and the personalisation of politics, specifically using data coming from the first expert survey on the personalisation of politics in Western Europe, the PoPES. A quantitative analysis is paired with more in-depth explorations of two Italian parties, the Italian Communist Party, Democratic Party of the Left, the Northern League, and the missed opening of their leader selectorate. This

book highlights the critical importance of studying party leader selection rules against the backdrop of allegedly declining parties and rising party leaders and concludes by placing its findings in a broader discussion about the future of Western European party leaders This book will be of key interest to scholars and students of political parties and party systems leadership political elites elections democracy and more widely of Western European politics and comparative politics

Political Parties and Interest Groups in Norway Elin Haugsgjerd Allern, 2024-10-31 How do today s political parties relate to other organisations Do they prefer rather distant relationships with a wide range of interest groups or have they virtually detached themselves from civil society altogether Scholars seem to agree that traditionally close relationships such as those between social democratic parties and trade unions have grown weaker since the 1960s But to date only limited systematic research has been conducted While parties and interest groups attract a great deal of attention from political scientists the links between them have been largely overlooked This book is an attempt to bridge the gap starting from the party side of the relationship It throws new light on the topic by presenting a theory driven comprehensive study of Norway s seven major political parties and their relationships with interest groups at the beginning of the new millennium Based on original and extensive data including party documents in depth interviews with key players and a survey of national party elites Elin Haugsgjerd Allern paints a nuanced picture of the nature and significance of these relationships and the factors that shape them A major conclusion is that Norway s parties tend to maintain rather distant but wide ranging relationships with interest groups today However some parties still have fairly strong links with their traditional associates and a narrower network of links with other groups Hence Allern also shows that significant differences exist between parties that are apparently exposed to the same social political and institutional environment
