Implementing the OECD Jobs Strategy Assessing Performance and Policy OECD, 1999-09-21 This study puts the spotlight on groups at the margin of the labour market and looks at the policies required to better integrate them **The OECD Jobs Study**, 1994 *Implementing the OECD Jobs Strategy* Organisation for Economic Co-operation and Development, 1999 This study puts the spotlight on groups at the margin of the labour market and looks at the policies required to better integrate them Models of Capitalism Evelyne Huber, 2002 Latin American societies have undergone fundamental changes in the past two decades moving from capitalist economies with very wide ranging state intervention to more market driven systems After a prolonged period of recession these changes produced some successes in economic growth in the 1990s but they also exacerbated many problems especially poverty and inequality *Models of Capitalism* examines why some societies with market economies perform much better than others in combining growth and equity and what the less successful countries can learn from the more successful ones The contributors look at different models of capitalism in Latin America Northeast and Southeast Asia and advanced industrial countries asking which patterns of economic and social policies governments in the more successful societies pursued and which configurations of institutions made pursuing such policies possible The investigation focuses on economic policies designed to stimulate growth on labor market policies designed to promote a qualified labor force and increase productivity and wages and on social policies designed to improve general human capital and to distribute life chances in an equitable way The volume is innovative in explicitly connecting the discussion of growth policies with an analysis of labor market and social policies and in going beyond comparison of Latin American with East Asian approaches to include reference to equity oriented policies in North America and Western Europe as well This approach helps demonstrate how important policy design is in determining distributive outcomes at any given level of development The contributors are Antonio Alas Renato Baumann Ha Joon Chang Carlos H Filgueira Fernando Filgueira Robert Grosse Thomas Janoski John Myles T J Pempel Wilson Peres David Brian Robertson John Sheahan John D Stephens Victor E Tokman and Bridget Welsh Sponsored by the Joint Committee on Latin American Studies of the Social Science Research Council and the American Council of Learned Societies Fighting Unemployment David R. The European Employment Strategy Diamond Ashiagbor, 2005 Labour law and social policy have long provided an arena within which key debates over the depth and pace of European integration have taken place Increasingly as the European Union's employment policy has matured employment and economic policy discourses have come to displace discourses around social policy and social law a displacement which has occurred in tandem with a shift from legislative harmonisation to the use of soft law and governance by means of guidelines This book charts the evolution of the European Employment Strategy and the new forms of governance to which it has given rise in particular the open method of coordination It offers an interdisciplinary exploration of European social law and employment policy scrutinizing the law and economics of labour market regulation in the European context and responding to the economic critique of traditional notions of social protection Through a detailed examination of the legal and economic underpinnings of the European Employment Strategy the author outlines the implications of this strategy for labour law social protection and industrial relations within the EU Using the open method of coordination in the European Employment Strategy as a case study the book also provides a timely contribution to the growing literature on new governance in the EU This innovative form of governance has the potential to forge a middle course through the regulatory choices facing the EU the choice over the appropriate level of regulation in the EU whether national or supranational that over the legitimate role for the state in regulating or deregulating the labour market and ultimately the choice between centralised harmonization and regulatory competition

Capital, Labor, and State David Brian Robertson, 2000 *Capital Labor and State* is a systematic and thorough

examination of American labor policy from the Civil War to the New Deal David Brian Robertson skillfully demonstrates that although most industrializing nations began to limit employer freedom and regulate labor conditions in the 1900s the United States continued to allow total employer discretion in decisions concerning hiring firing and workplace conditions Robertson argues that the American constitution made it much more difficult for the American Federation of Labor government and business to cooperate for mutual gain as extensively as their counterparts abroad so that even at the height of New Deal American labor market policy remained a patchwork of limited protections uneven laws and poor enforcement lacking basic national standards even for child labor

Globalisation and its Discontents John Wiseman,2000-06-13 Most analyses of globalization convey the message that it is an unstoppable force sweeping away national sovereignty and inevitably creating a brave new world of borderless and boundless consumerism In such a context politics and democracy become irrelevant This collection of essays develops a more critical and grounded analysis of the nature and implications of globalization Many of the contributions to this book conclude that there are real political choices to be made Even though the economic context has changed politics still matters
