

The background of the cover is an abstract, textured composition of swirling, concentric lines. The colors transition from a deep, dark green in the center to a vibrant, fiery red at the top and bottom edges. The lines are dense and create a sense of movement and depth, reminiscent of a microscopic view of a material or a celestial nebula.

Of This And Other Worlds:

The Modern Stage and Other Worlds (Routledge Revivals) Austin E. Quigley, 2015-08-11 Modern plays are strikingly diverse and as a result any attempt to locate an underlying unity between them encounters difficulties to focus on what they have in common is often to overlook what is of primary importance in particular plays to focus on their differences is to note the novelty of the plays without increasing their accessibility In this study first published in 1985 Austin E Quigley takes as his paradigm case the relationship between the world of the stage and the world of the audience and explores various modes of communication between domains He asks how changes in the structure of the drama relate to changes in the structure of the theatre and changes in the role of the audience Detailed interpretations of plays by Pinero Ibsen Strindberg Brecht Ionesco Beckett and Pinter question principles about the modern theatre and establish links between drama structure and theatre structure theme and performance space

Dreams of Other Worlds Chris Impey, Holly Henry, 2016-04-19 The story of unmanned space exploration from Viking to today Dreams of Other Worlds describes the unmanned space missions that have opened new windows on distant worlds Spanning four decades of dramatic advances in astronomy and planetary science this book tells the story of eleven iconic exploratory missions and how they have fundamentally transformed our scientific and cultural perspectives on the universe and our place in it The journey begins with the Viking and Mars Exploration Rover missions to Mars which paint a startling picture of a planet at the cusp of habitability It then moves into the realm of the gas giants with the Voyager probes and Cassini s ongoing exploration of the moons of Saturn The Stardust probe s dramatic round trip encounter with a comet is brought vividly to life as are the SOHO and Hipparcos missions to study the Sun and Milky Way This stunningly illustrated book also explores how our view of the universe has been brought into sharp focus by NASA s great observatories Spitzer Chandra and Hubble and how the WMAP mission has provided rare glimpses of the dawn of creation Dreams of Other Worlds reveals how these unmanned exploratory missions have redefined what it means to be the temporary tenants of a small planet in a vast cosmos
