**The Official Railway Guide** ,1902     The National Union Catalog, Pre-1956 Imprints ,1968     **Supplying the Nuclear Arsenal** Rodney P. Carlisle,2020-02-04 Originally published in 1996 Although the history of commercial power nuclear reactors is well known the story of the government reactors that produce weapons grade plutonium and tritium has been shrouded in secrecy Supplying the Nuclear Arsenal looks at the origin and development of these production reactors Rodney Carlisle and Joan Zenzen describe a fifty year government effort no less complex expensive and technologically demanding than the Polaris or Apollo programs yet one about which most Americans know virtually nothing Carlisle and Zenzen describe the evolution of the early reactors the atomic weapons establishment that surrounded them and the sometimes bitter struggles between business and political constituencies for their share of nuclear pork They show how since the 1980s aging production reactors have increased the risk of radioactive contamination of the atmosphere and water table And they describe how the Department of Energy mounted a massive effort to find the right design for a new generation of reactors only to abandon that effort with the end of the Cold War Today all American production reactors remain closed Due to short half life the nation s supply of tritium crucial to modern weapons is rapidly dwindling As countries like Iraq and North Korea threaten to join the nuclear club the authors contend the United States needs to revitalize tritium production capacity in order to maintain a viable nuclear deterrent Meanwhile as slowly decaying artifacts of the Cold War the closed production reactors at Hanford Washington and Savannah River South Carolina loom ominously over the landscape
