*Institutions, Behaviour and Economic Theory* Heinrich Bortis,1997 This book is about the conceptual

foundations of an intermediate way between liberalism and socialism From a standpoint of economic theory this middle way is conceived of as a synthesis of classical Ricardian and Keynesian political economy While the former deals with proportions between individuals or collectives and society in tackling the problems of distribution and value on the basis of the surplus principle the latter is concerned with the scale of economic activity as explained by the principle of effective demand Political economy pictures the economic aspects of the functioning of the institutional system within which the behaviour of individuals is embedded The economy considered is primarily neither a market nor a planned economy but rather a monetary production economy To establish an alternative to liberalism and socialism requires setting up a system of the social sciences In this work suggestions are made for linking political economy with other social sciences i e sociology law and politics in the traditional sense thus establishing the unity of the social sciences In a Keynesian vein the social sciences are conceived of as moral sciences a view which gives rise to a specific philosophy of history To complete the picture issues of method associated with the theory of knowledge in the social sciences and the problem of linking theory with historical reality are also covered

Austrian Theory and Economic Organization G. Nell,2014-08-13 The Austrian economic school famously predicted and explained the problems of calculation in a socialist society With their concept of spontaneous order they challenged mainstream economists to look beyond simplified static models and consider the dynamic and evolutionary characteristics of social orders However many feel that Austrians took their victory too far and became ideologically devoted to laissez faire Austrian Theory and Economic Organization is a collection of essays on problems and possibilities in economic organization written by economists and political scientists with an interest in the dynamic and evolutionary nature of market economies Each chapter explores areas of potential agreement between Austrian theory market socialist economics and other heterodox schools of economic and political science The collection aims to bridge cultural and political divisions between free market advocates who stress individual rights and left leaning thinkers who stress social justice and a culture of solidarity
