## **Management And Language The Manager As A Practical Author:**

*Management and Language* David Holman, Richard Thorpe, 2003 *Management and Language* explores and develops the image of the manager as one who is aware of and attends to the way in which language is used in everyday managerial activity. Much managerial activity is achieved through language and a vital task for any manager is to generate with others an intelligible account of the various feelings that surround the contested issues in the organization. Such a process involves reading a context from different perspectives, constructing new meanings, framing the complexities and dilemmas faced into new landscapes of possible future actions, and creating a persuasive argument for those landscapes amongst those who must work in them. For such a process to be conducted successfully, a range of abilities and skills become relevant, such as storytelling, metaphors, and developing arguments. *Management and Language* is a timely publication with contributions from eminent academics in the field. This book will be engaging reading to academics and management teachers interested in critical management theory and those generally open to new and different approaches to management. It will also be of relevance to practising managers who wish to have a deeper understanding of how they use language in their everyday work.

**Language and Communication at Work** François Cooren, Eero Vaara, Ann Langley, Haridimos Tsoukas, 2014-05-08 With the growing influence of discursive and narrative perspectives on organizing, organizational scholars are focusing increasing attention on the constitutive role that language and communication play in organizational processes. This view conceptualizes language and communication as bringing organization into being in every instant and is therefore inherently sympathetic to a process perspective. However, our understanding of the role of language in unfolding organizational processes and as a part of organizational action is still limited. This volume brings together empirical and/or conceptual contributions from leading scholars in organization and communication to develop understanding of language and

communication as constitutive of work and also analyze how language and communication actually work to achieve influence in the context of organizations It aims to elucidate the role language communication and narrativity play as part of strategic and institutional work in and around organizational phenomena In keeping with the preceding volumes in the Perspectives on Process Organization Studies series this collection demonstrates why we need to start thinking processually and offers a range of theoretical and methodological approaches to studying these works in process that we call organizations companies businesses institutions communities associations or NGOs
