Office Automation:

Office Automation Don Tapscott, 2012-12-06 Every pioneer takes large risks hoping that the new frontier he seeks will provide the benefits of independence and good fortune Don Tapscott is such a pioneer in the area of office automation He has been a true pioneer having entered the field in its early days and taken the risk of working not in technology which was fashionable but in the field of the problems of organizations which was less fashionable but in many ways more important The utilization of computers for data processing accounting inventory and other bread and butter applications is now well entrenched in our society and culture The process of designing such systems tends to focus on the needs of the company and the constraints of the equipment leading to efficient systems with little tolerance for the variety of people who must use or interface with them Within the office automation area these methods do not work nearly as well The frequency and amount of human interaction in the office environment and the wide variety of situations and reactions there in demands a different design methodology

Design Discourse Victor Margolin, 1989-09-15 The editor has gathered together a body of writing in the emerging field of design studies The contributors argue in different ways for a rethinking of design in the light of its cultural significance and its powerful position in today s society The collection begins with a discussion of the various expressions of opposition to the modernists purist approach toward design Drawing on postmodernist theory and other critical strategies the writers examine the relations among design technology and social organization to show how design has become a complex and multidisciplinary activity The second section provides examples of new methods of interpreting and analysing design ranging from rhetoric and

semiotics to phenomenology demonstrating how meaning is created visually A final section related to design history shifts its emphasis to ideological frameworks such as capitalism and patriarchy that establish boundaries for the production and use of design
