## **Project Cyclops A Design Study Of A System For Detecting Extraterrestrial Intelligent Life:**

*Project Cyclops* John Billingham, B. M. Oliver, 2010-07-26 A look at NASA's ongoing search for intelligent life and its visions for future searches. Research text includes astronomical data, formulas, many charts and graphs. Contents: Life in the Universe, Some Reasons for the Search, Possible Methods of Contact, Communication by Electromagnetic Waves, Acquisition, The Central Problem, The Cyclops System, Antenna Elements, The Receiver System, Transmission and Control, Signal processing, Cyclops as a Beacon, Search Strategy, Cyclops as a Research Tool, Conclusions and Recommendations, appendix, TGS Publishing Note. This is a facsimile book of an original printing. TGS invested in software and equipment in late 2008 that really increased the quality and speed to create facsimile books. This investment helps overcome many problems of reproducing many older books such as yellowed pages, stains, see thru or onion skin type paper, colored paper, brown inks, etc. These are scanned pages, not copied pages, and the quality of print truly represents the quality of the print of the original book, though we may have been able to enhance or darken the print. We are proud to be able to preserve this work through new technology.

**NASA Technical Paper**, 1984 **A Dictionary of the Space Age** Paul Dickson, 2009-05-18 2009 Outstanding Academic Title Choice. The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement. As television news anchors, radio hosts, and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens, words that belonged to the worlds of science, aviation, and science fiction suddenly became part of the colloquial language. What's more, NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible. To translate this peculiar vocabulary, Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names, words, and phrases of the Space Age. Aviators, fighter pilots, and test pilots coined the phrases "spam in a can" and "how astronauts felt prelaunch as they sat in a tiny capsule atop a rocket booster: tickety-boo, things are fine, and the Eagle has landed." Neil Armstrong's famous quote when Apollo 11 landed on the Moon. This dictionary captures a broader foundation for the language of the Space Age based on the historic principles employed by the Oxford English Dictionary and Webster's New Third International Dictionary. Word histories for major terms are detailed in a conversational tone, and technical terms are deciphered for the interested student and lay reader. This is a must-own reference for space history buffs.
