Maximum Entropy Econometrics Robust Estimation With Limited Data:

Maximum Entropy Econometrics Amos Golan, George G. Judge, Douglas Miller, 1996-05 This monograph examines the problem of recovering and processing information when the underlying data are limited or partial and the corresponding models that form the basis for estimation and inference are ill posed or undermined

Handbook of Empirical Economics and Finance Aman Ullah, David E. A. Giles, 2016-04-19 Handbook of Empirical Economics and Finance explores the latest developments in the analysis and modeling of economic and financial data Well recognized econometric experts discuss the rapidly growing research in economics and finance and offer insight on the future direction of these fields Focusing on micro models the first group of chapters describes the statistical issues involved in the analysis of econometric models with cross sectional data often arising in microeconomics The book then illustrates time series models that are extensively used in empirical macroeconomics and finance The last set of chapters explores the types of panel data and spatial models that are becoming increasingly significant in analyzing complex economic behavior and policy evaluations This handbook brings together both background material and new methodological and applied results that are extremely important to the current and future frontiers in empirical economics and finance It emphasizes inferential issues that transpire in the analysis of cross sectional time series and panel data based empirical models in economics finance and related disciplines

Theoretical and Applied Statistics Corrado Crocetta, 2019-02-12 This book is devoted to Corrado Gini father of the Italian statistical school It celebrates the 50th anniversary of his death by bearing witness to the continuing extraordinary scientific relevance of his interdisciplinary interests The book comprises a selection of the papers presented at the conference of the Italian Statistical Society Statistics and Demography the Legacy of Corrado Gini held in Treviso in September 2015 The work covers many topics linked to Gini s scientific legacy ranging from the theory of statistical inference to multivariate statistical analysis demography and sociology In this volume readers will find many interesting contributions on entropy measures permutation procedures for the heterogeneity test robust estimation of skew normal parameters S weighted estimator measures of multidimensional performance using Gini s delta small sample confidence intervals for Gini s gamma index Bayesian estimation of the Gini Simpson index spatial residential patterns of selected foreign groups minority segregation processes dynamic time warping to study cruise tourism and financial stress spill over This book will appeal to all statisticians demographers economists and sociologists interested in the field

Foundations of Info-Metrics Amos Golan, 2017-11-07 Foundations of Info Metrics provides an overview of modeling and inference rather than a problem specific model and progresses from the simple premise that information is often insufficient to provide a unique answer for decisions we wish to make Each decision or solution is derived from the available input information along with a choice of inferential procedure

Bayesian Inference and Maximum Entropy Methods in Science and Engineering Marcelo de Souza Laretto, Carlos A. de Bragança Pereira, Julio Michael Stern, 2008-12-04 The MaxEnt2008

28th International Workshop on Bayesian Inference and Maximum Entropy Methods in Science and Engineering encompassed all aspects of information theory probability statistical inference and statistical physics including research on foundations and theoretical developments as well as modeling techniques for several specific application areas

Maximum Entropy Estimation of Land Use Shares and Transitions Andrew Plantinga, Douglas Miller, 1997 This study presents a methodology for estimating land use shares and transitions Our approach emphasizes the importance of land quality in determining land use Land quality is an index of the physical characteristics of land such as soil depth slope and water capacity We develop a procedure for recovering the probability that land of a given quality is put to a particular use In addition we identify the probability that land shifts from one use to another

Applied Methods for Agriculture and Natural Resource Management Siwa Msangi, Duncan MacEwan, 2019-05-17 This book assesses recent developments in the analysis of agricultural policy and water resource management and highlights the utility and theoretical rigor of quantitative methods for modeling agricultural production market dynamics and natural resource management In diverse case studies of the intersection between agriculture environmental quality and natural resource sustainability the authors analyze economic behavior both at aggregate as well as at individual agent level in order to highlight the practical implications for decision makers dealing with environmental and agricultural policy The volume also addresses the challenges of doing robust analysis with limited data and discusses the appropriate empirical approaches that can be employed The studies in this book were inspired by the work of Richard E Howitt Emeritus Professor of Agricultural Economics at the University of California at Davis USA whose career has focused on the application of robust empirical methods to address concrete policy problems

Bayesian Inference and Maximum Entropy Methods in Science and Engineering Ali Mohammad-Djafari, 2001-06-08 Bayesian inference and maximum entropy methods are central points of new scientific inference in mathematical physics and in all inverse problems in engineering and all probabilistic data analysis This volume contains peer reviewed selection of the papers presented at this international workshop Topics included are axiomatics and concepts bayesian parameter estimation algorithms for bayesian computation deconvolution and source separation quantum tomography tomographic imaging and image processing as well as bayesian inference in applications

Foundations of Info-metrics Amos Golan, 2018 Info metrics is the science of modeling reasoning and drawing inferences under conditions of noisy and insufficient information It is at the intersection of information theory statistical inference and decision making under uncertainty It plays an important role in helping make informed decisions even when there is inadequate or incomplete information because it provides a framework to process available information with minimal reliance on assumptions that cannot be validated In this pioneering book Amos Golan a leader in info metrics focuses on unifying information processing modeling and inference within a single constrained optimization framework Foundations of Info Metrics provides an overview of modeling and inference rather than a problem specific model and progresses from the

simple premise that information is often insufficient to provide a unique answer for decisions we wish to make Each decision or solution is derived from the available input information along with a choice of inferential procedure The book contains numerous multidisciplinary applications and case studies which demonstrate the simplicity and generality of the framework in real world settings Examples include initial diagnosis at an emergency room optimal dose decisions election forecasting network and information aggregation weather pattern analyses portfolio allocation strategy inference for interacting entities incorporation of prior information option pricing and modeling an interacting social system Graphical representations illustrate how results can be visualized while exercises and problem sets facilitate extensions This book is this designed to be accessible for researchers graduate students and practitioners across the disciplines *Advances in Info-Metrics* Min Chen,J. Michael Dunn,Amos Golan,Aman Ullah,2020-11-06 Info metrics is a framework for modeling reasoning and drawing inferences under conditions of noisy and insufficient information It is an interdisciplinary framework situated at the intersection of information theory statistical inference and decision making under uncertainty In *Advances in Info Metrics* Min Chen J Michael Dunn Amos Golan and Aman Ullah bring together a group of thirty experts to expand the study of info metrics across the sciences and demonstrate how to solve problems using this interdisciplinary framework Building on the theoretical underpinnings of info metrics the volume sheds new light on statistical inference information and general problem solving The book explores the basis of information theoretic inference and its mathematical and philosophical foundations It emphasizes the interrelationship between information and inference and includes explanations of model building theory creation estimation prediction and decision making Each of the nineteen chapters provides the necessary tools for using the info metrics framework to solve a problem The collection covers recent developments in the field as well as many new cross disciplinary case studies and examples Designed to be accessible for researchers graduate students and practitioners across disciplines this book provides a clear hands on experience for readers interested in solving problems when presented with incomplete and imperfect information **Bayesian Inference and Maximum Entropy Methods in Science and Engineering** Kevin H. Knuth,Ali E. Abbas,Robin D. Morris,J. Patrick Castle,2005-12-06 All papers were peer reviewed For over 25 years the MaxEnt workshops have explored Bayesian and Maximum Entropy methods in scientific engineering and signal processing applications This proceedings volume covers all aspects of probabilistic inference such as techniques applications and foundations Applications include physics space science earth science biology imaging graphical models and source separation *Maximum Entropy and Bayesian Methods* G.
